QUESTION 2

Click the Exhibit button.

```
CDOT95::> vserver export-policy rule show -vserver SVM1 -policyname esx
                Policy              Rule    Access    Client                      RO
Vserver         Name                Index   Protocol  Match                       Rule
--------------- ------------------- ------- --------- --------------------------- ---------
SVM1            esx                 1       any       192.168.1.0/24              any

CDOT95::> volume show -vserver SVM1 -fields policy
vserver    volume          policy
-------    ----------      ---------
SVM1       NFS_DS01        default
```

An administrator enabled the NFS protocol on an SVM and created a volume to be used as a datastore in a VMware environment. An administrator attempts to mount the NFS volume and receives the "Cannot mount / access an NFS volume or file system" error.

Referring to the exhibit, which step must the administrator take to solve this problem?

A. Reorder the rule indexes.

B. Change the security style.

C. Assign the export policy.

D. Change the access protocol.

Correct Answer: C
