QUESTION 1

You perform a security trace when troubleshooting a data access problem for a user. The results are shown in the exhibit.

```
cluster1::> vserver security trace trace-result show -vserver svml

Vserver: svml

Node          Index  Filter Details          Reason
-----
cluster1-01  1      Security Style: NTFS and  Access is denied. The
              NT ACL                    requested permissions are not
                                   granted by the ACE while
                                   opening existing file or
                                   directory. Access is not
                                   granted for: "Read Attributes"

              Protocol: cifs
              Volume: -
              Share: dept
              Path: /list.xlsx
              Win-User: LAB\domusr1
              UNIX-User: pcuser
              Session-ID: 14249952170953675090
```

What should you do to solve this issue?

- A. Grant the user Read Attributes access to the path.
- B. Add the user to the BUILTIN\power Users group.
- C. Add the user to the BUILTIN\Users group.
- D. Grant the user Execute access to the path.

Correct Answer: A Section: (none)
