QUESTION 2

You are using OnCommand Unified Manager to monitor the health and availability of your data protection relationships.

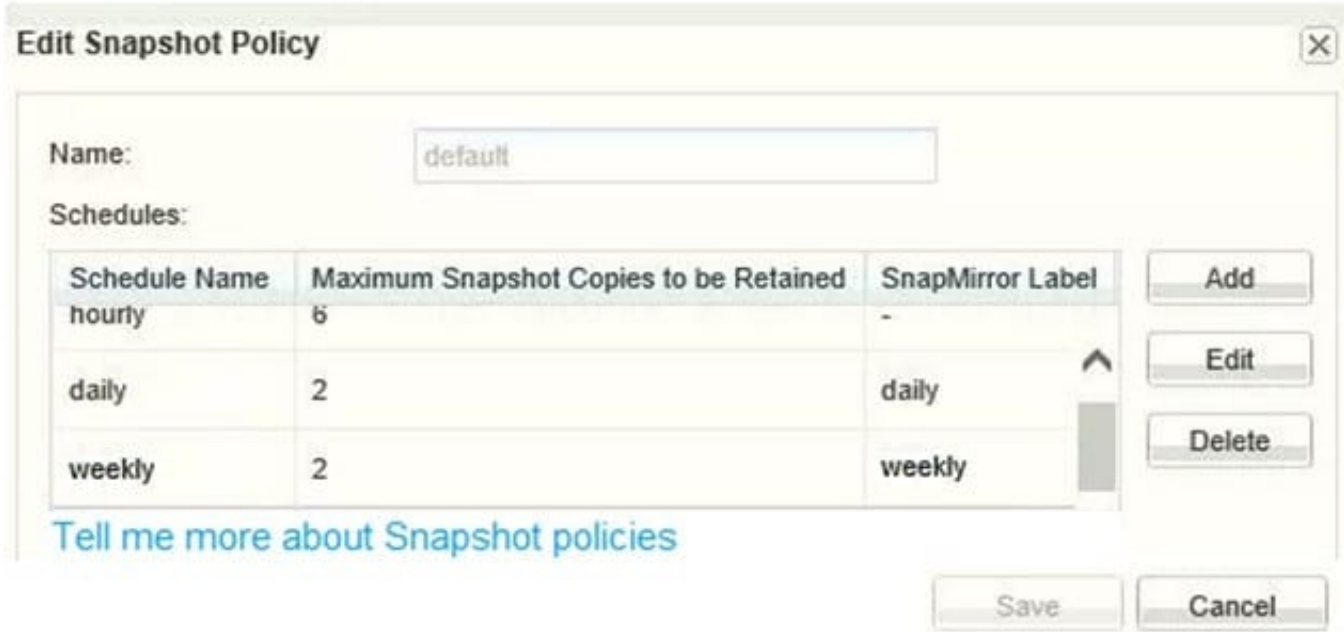

In this situation, what must be added to enable you to create, break, and resynchronize relationships?

- A. SnapCenter
- B. OnCommand System Manager
- C. OnCommand Insight
- D. OnCommand Workflow Automation

Correct Answer: D

QUESTION 3

Click the Exhibit button.

You have a volume that was configured a year ago using the default Snapshot policy that is shown in the exhibit. You need to increase the number of hourly maximum Snapshot copies to retain only four copies.

Which additional action is needed to keep only four hourly Snapshot copies in this volume after modifying the schedule?

- A. Delete two hourly Snapshot copies
- B. Reapply the default policy to the volume
- C. Modify the volume guarantee
- D. Modify the Snapshot reserve.

Correct Answer: A

QUESTION 4

Your customer wants to be notified of SnapMirror lag errors within 15 minutes. The customer is not interested in maintaining custom scripts.

How would you accomplish this task?

- A. Use OnCommand Unified Manager to create an error alert for SnapMirror Relationship lag.
- B. Use OnCommand Unified Manager to generate Volume Transfer Status reports on a schedule.
- C. Use OnCommand System Manager to notify on Protection Health errors.
- D. Use OnCommand System Manager to create a warning alert for SnapMirror lag.

Correct Answer: A
