### QUESTION 1

How do you restrict an administrator's access to a subset of your organization's ADOMs?

- A. Set the ADOM mode to Advanced
- B. Assign the ADOMs to the administrator's account
- C. Configure trusted hosts
- D. Assign the default Super\_User administrator profile

Correct Answer: B

---

### QUESTION 2

What happens when a log file saved on FortiAnalyzer disks reaches the size specified in the device log settings?

- A. The log file is stored as a raw log and is available for analytic support.
- B. The log file rolls over and is archived.
- C. The log file is purged from the database.
- D. The log file is overwritten.

Correct Answer: B

---

### QUESTION 3

For which two purposes would you use the command set log checksum? (Choose two.)

- A. To help protect against man-in-the-middle attacks during log upload from FortiAnalyzer to an SFTP server
- B. To prevent log modification or tampering
- C. To encrypt log communications
- D. To send an identical set of logs to a second logging server

Correct Answer: AB

To prevent the log in the store from being modified, you can add a log checksum by using the config system global command. When the log is split, archived, and the log is uploaded (if the feature is enabled), you can configure the FortiAnalyzer to log the log file hash value, timestamp, and authentication code. This can help defend against man-in-the-middle attacks when uploading log transmission data from the FortiAnalyzer to the SFTP server.

---

**QUESTION 4**

What is the purpose of the following CLI command?

```
# configure system global
  set log-checksum md5
end
```

- A. To add a log file checksum
- B. To add the MD5's hash value and authentication code
- C. To add a unique tag to each log to prove that it came from this FortiAnalyzer
- D. To encrypt log communications

Correct Answer: A

---

**QUESTION 5**

FortiAnalyzer centralizes which functions? (Choose three)

- A. Network analysis
- B. Graphical reporting
- C. Content archiving / data mining
- D. Vulnerability assessment
- E. Security log analysis / forensics

Correct Answer: BCE
