QUESTION 1

Under what circumstances would you want to use the temporary uncompress feature of FortiWeb?

A. In the case of compression being done on the FortiWeb, to inspect the content of the compressed file

B. In the case of the file being a .MP3 music file

C. In the case of compression being done on the web server, to inspect the content of the compressed file.

D. In the case of the file being an .MP4 video

Correct Answer: C

QUESTION 2

Which implementation is best suited for a deployment that must meet compliance criteria?

A. SSL Inspection with FortiWeb in Transparency mode

B. SSL Offloading with FortiWeb in reverse proxy mode

C. SSL Inspection with FrotiWeb in Reverse Proxy mode

D. SSL Offloading with FortiWeb in Transparency Mode

Correct Answer: C

QUESTION 3

A client is trying to start a session from a page that should normally be accessible only after they have

logged in.

When a start page rule detects the invalid session access, what can FortiWeb do? (Choose three.)

A. Reply with a "403 Forbidden" HTTP error

B. Allow the page access, but log the violation

C. Automatically redirect the client to the login page

D. Display an access policy message, then allow the client to continue, redirecting them to their requested page

E. Prompt the client to authenticate

Correct Answer: ABC

QUESTION 4

You are using HTTP content routing on FortiWeb. Requests for web app A should be forwarded to a

cluster of web servers which all host the same web app. Requests for web app B should be forwarded to a

different, single web server.

Which is true about the solution?

A. Static or policy-based routes are not required.

B. To achieve HTTP content routing, you must chain policies: the first policy accepts all traffic, and forwards requests for web app A to the virtual server for policy A. It also forwards requests for web app B to the virtual server for policy B. Policy A and Policy B apply their app-specific protection profiles, and then distribute that app\\'s traffic among all members of the server farm.

C. You must put the single web server into a server pool in order to use it with HTTP content routing.

D. The server policy applies the same protection profile to all its protected web apps.

Correct Answer: B

QUESTION 5

What other consideration must you take into account when configuring Defacement protection A. Use FortiWeb to block SQL Injections and keep regular backups of the Database

B. Also incorporate a FortiADC into your network

C. None. FortiWeb completely secures the site against defacement attacks

D. Configure the FortiGate to perform Anti-Defacement as well

Correct Answer: D
