---

**QUESTION 4**

What functional component has the objectives to solve severe repeating incidents, and to minimize the impact of

incidents that cannot be prevented?

- A. Problem
- B. Event
- C. Diagnostics and Remediation
- D. Service Level

Correct Answer: A

The Problem functional component is responsible for managing the lifecycle of all Problems. The objectives of the Problem functional component are to solve severe/repeating Incidents, prevent Incidents from happening, and minimize the impact of Incidents that cannot be prevented. The Problem cause is not usually known at the time of the Problem data object instance creation, and the Problem functional component is responsible for the investigation. The Problem functional component also serves as the main exit point from the D2C Value Stream for the feedback information about IT services issues. The feedback is reported to the R2D Value Stream in the form of Defects and to the S2P Value Stream in the form of Portfolio Backlog Items (demand request).
