QUESTION 1
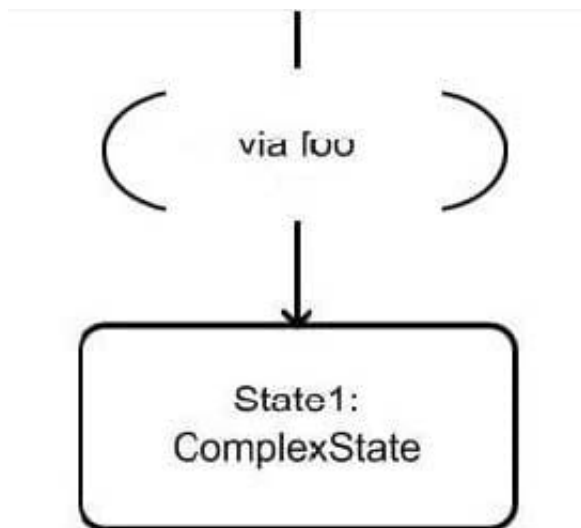

What best describes the semantics modeled by the exhibit?

A. The Order Entity component is part of the internals of the Invoicer component.

B. The Invoicer has a complex connector that connects the Generate Invoice interface with the Order interface.

C. This is an illegal diagram.

D. The Invoicer has a complex port that provides the interface Generate Invoice and requires the interface Order.

Correct Answer: D

QUESTION 2

What does via foo in the exhibit designate?

A. an action foo associated with the transition

B. transient pseudostate named foo

C. a transition terminating on the foo entry point

D. a Boolean guard equal to the logical value of foo

E. the sending of a foo message on the transition

Correct Answer: C

QUESTION 3

What are valid ways to present a component\\'s artifacts file, such as a jar file? (Choose two.)

A. stereotype of class with keyword with a solid arrow pointing to the related component

B. stereotype of class with keyword with a dashed arrow pointing to the related component

C. stereotype of a component with keyword with a dashed arrow pointing to the related component

D. as a compartment of a related component

E. stereotype of a component with keyword with a solid arrow pointing to the related component

Correct Answer: BD

QUESTION 4

Assume component A provides an interface P and requires an interface R. In order for a component B to be substituted for component A, what must be true?

A. The interface that B requires must be type conformant with respect to the interface that A provides.

B. The interface that B requires must be type conformant with respect to the interface that A requires, and the interface that B provides must be type conformant with respect to the interface that A provides.

C. The interface that A requires must be type conformant with respect to the interface that B provides.

D. Components must be related to each other via a dependency.

Correct Answer: B

QUESTION 5

What situation results from performing a Create Object Action on an abstract class?

A. undefined behavior

B. arbitrary object of one of its subclasses being created

C. exception being raised

D. error log entry created

E. object of the specified class being created

Correct Answer: A
