QUESTION 1

An internal host wants to connect to servers of the internet through using source NAT. Which policy is required to enable source NAT on the firewall?

- A. NAT policy with source zone and destination zone specified
- B. post-NAT policy with external source and any destination address
- C. NAT policy with no source of destination zone selected
- D. pre-NAT policy with external source and any destination address

Correct Answer: A

QUESTION 2

An administrator is reviewing the Security policy rules shown in the screenshot below. Which statement is correct about the information displayed?

- A. Eleven rules use the "Infrastructure* tag.
- B. The view Rulebase as Groups is checked.
- C. There are seven Security policy rules on this firewall.
- D. Highlight Unused Rules is checked.

Correct Answer: B

QUESTION 3

How would a Security policy need to be written to allow outbound traffic using Secure Shell (SSH) to destination ports tcp/22 and tcp/4422?

A. The admin creates a custom service object named "tcp-4422" with port tcp/4422. The admin then creates a Security policy allowing application "ssh" and service "tcp-4422".

B. The admin creates a custom service object named "tcp-4422" with port tcp/4422. The admin then creates a Security policy allowing application "ssh", service "tcp-4422", and service "application-default".

C. The admin creates a custom service object named "tcp-4422" with port tcp/4422. The admin also creates a custom service object named "tcp-22" with port tcp/22. The admin then creates a Security policy allowing application "ssh", service "tcp-4422", and service "tcp-22".

D. The admin creates a Security policy allowing application "ssh" and service "application-default".

Correct Answer: C

QUESTION 4

Refer to the exhibit. An administrator is using DNAT to map two servers to a single public IP address. Traffic will be steered to the specific server based on the application, where Host A (10.1.1.100) receives HTTP traffic and Host B

(10.1.1.101) receives SSH traffic.

Which two Security policy rules will accomplish this configuration? (Choose two.)

- A. Untrust (Any) to DMZ (1.1.1.100), ssh Allow
- B. Untrust (Any) to Untrust (10.1.1.1), web-browsing -Allow
- C. Untrust (Any) to Untrust (10.1.1.1), ssh -Allow
- D. Untrust (Any)to DMZ (10.1.1.100. 10.1.1.101), ssh, web-browsing-Allow
- E. Untrust (Any) to DMZ (1.1.1.100), web-browsing Allow

Correct Answer: AE

QUESTION 5

When creating a Source NAT policy, which entry in the Translated Packet tab will display the options Dynamic IP and Port, Dynamic, Static IP, and None?

NAT Policy Rule	original Packet Translat	ed Packet
Source Address Tran Translation Type Address Type Interface IP Address		Destination Address Translation Translation Type
		OK Cancel
. Translation Type		

- C. Address Type
- D. IP Address
- Correct Answer: A
