QUESTION 1

What must be configured for the firewall to access multiple authentication profiles for external services to authenticate a non-local account?

- A. authentication sequence
- B. LDAP server profile
- C. authentication server list
- D. authentication list profile

Correct Answer: A

QUESTION 2

Which action can be set in a URL Filtering Security profile to provide users temporary access to all websites in a given category using a provided password?

- A. exclude
- B. continue
- C. hold
- D. override

Correct Answer: D

The user will see a response page indicating that a password is required to allow access to websites in the given category. With this option, the security administrator or help-desk person would provide a password granting temporary access to all websites in the given category. A log entry is generated in the URL Filtering log. The Override webpage doesn't display properly on client systems configured to use a proxy server.

QUESTION 3

Which two features can be used to tag a user name so that it is included in a dynamic user group? (Choose two)

- A. XML API
- B. log forwarding auto-tagging
- C. GlobalProtect agent
- D. User-ID Windows-based agent

Correct Answer: AD

QUESTION 4

When configuring a security policy, what is a best practice for User-ID?

- A. Use only one method for mapping IP addresses to usernames.
- B. Allow the User-ID agent in zones where agents are not monitoring services.
- C. Limit User-ID to users registered in an Active Directory server.
- D. Deny WMI traffic from the User-ID agent to any external zone.

Correct Answer: D

QUESTION 5

What is the main function of Policy Optimizer?

- A. reduce load on the management plane by highlighting combinable security rules
- B. migrate other firewall vendors\' security rules to Palo Alto Networks configuration
- C. eliminate "Log at Session Start" security rules
- D. convert port-based security rules to application-based security rules

Correct Answer: D
