QUESTION 1

An insurance claim case is filed by a customer and assigned a claim type (fire, flood, or theft). The claim contains a list of loss items. Which of the data would you store in a local data source?

- A. Customer data
- B. Items of loss
- C. Claim types
- D. Policy details

Correct Answer: C

QUESTION 2

You are designing a form that uses a repeating grid to display office furniture items. Which two data sources can you use as a source for a repeating grid? (Choose two.)

- A. Local data storage
- B. A page group property that holds the data
- C. A page list property that holds the data
- D. A single value property that contains the data in a local list

Correct Answer: BC

QUESTION 3

A form allows customers to specify the amount of a balance transfer for their credit card. The form contains two fields: one to display the available balance on the customer's credit card, and one for the user to enter the amount of the balance transfer.

You configure a validate rule to verify that the amount of a balance transfer is less than 75% of the available balance on the customer's credit card. How do you call the validate rule?

- A. From the step in the case life cycle.
- B. From the section that contains the field for entering the amount of the balance transfer
- C. From the flow action where the customer submits the form
- D. From the property used to capture the amount of the balance transfer

Correct Answer: C

QUESTION 4

In an application, three email addresses (work, home, and other) can be captured for a customer. You use .Email (work) to refer to the work email address. What type of property is used to capture the email addresses?

- A. Page
- B. Value group
- C. Value list
- D. Page group

Correct Answer: B

QUESTION 5

A new hire process includes a Screen Job Applicant assignment. The recruiter who has been assigned the task should complete it within 24 hours. If the assignment is not completed in 24 hours, the system automatically sends an email notification to the hiring manager.

How would you configure the process to ensure that the director receives the email after the goal is passed?

- A. Add a Send Email shape to the process after the assignment.
- B. Add an SLA with an escalation action to the assignment.
- C. Add the SendCorrespondence flow action to the assignment.
- D. Add a notification to the assignment.

Correct Answer: B
