QUESTION 2

A health plan application includes a process for surgical procedure requests. Currently, there is an evaluation subprocess in which a physician reviews the diagnosis and enters the recommended procedure and its urgency. The request then

advances to a medical director who analyzes the feedback and approves the appropriate procedure. The health care organization has created a new requirement, which states that three physicians can perform the evaluation independently.

Only two evaluations are necessary to advance the case to the medical director.

How do you configure the process so that the request can continue to be processed if only two of the three physicians approve the order?

- A. Use a Some join condition
- B. Use a decision table
- C. Use an Any join condition
- D. Use a validate rule

Correct Answer: A

QUESTION 3

While running an application, a user notes that a system exception occurred.

Which log do you review to identify the issue?

- A. Alert
- B. Pega

C. BIX

D. AlertSecurity

Correct Answer: C

QUESTION 4

Business users are not able to update a delegated business rule. Select two possible causes. (Choose two.)

A. The business users do not have appropriate privileges in the access group

B. The availability of the delegated business rule is set to Blocked

C. The delegated business rule is currently being executed by another user

D. The delegated business rule is not in an unlocked production ruleset

Correct Answer: AD
