QUESTION 1

You create a canvas app within a Power Platform environment.

You need to identify potential accessibility issues for the canvas app before making the app available to other users.

Which tool should you use?

A. Portal Checker

B. App Checker

C. Solution Checker

Correct Answer: B

Find accessibility issues

1.

In the upper-right corner of Power Apps Studio, select the icon for the App checker.

2.

In the menu that appears, select Accessibility.

A list of issues appears, sorted first by severity and then by screen.

QUESTION 2

HOTSPOT

You need to implement the student attendance requirements.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Component
Cooking class ownership	▼
	User owned by students
	User owned by instructors
	User owned by chefs
	Organization owned

Student attendance	▼
	Task
	Appointment
	Custom activity
	Recurring appointment

Correct Answer:

Answer Area

Requirement	Component
Cooking class ownership	User owned by students **User owned by instructors** User owned by chefs Organization owned
Student attendance	Task **Appointment** Custom activity Recurring appointment

QUESTION 3

A company has an on-premises system that stores product information. The company plans to replace the information with a Power Platform solution that uses the Common Data Service.

The Power Platform solution needs to use data from the product information system.

You need to transform and import the data from the product information system.

Which two tools should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Dataflow

B. Business process flow

C. Power BI Desktop

D. Data gateway

Correct Answer: AD

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between on- premises data (data that isn\\'t in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud

services.

Can use the Power Platform dataflows to load entity in CDS with the option to transform data.

QUESTION 4

You have recently built a canvas app. You are now required to share the app with your colleagues. Which of the following is TRUE with regards to sharing a canvas app? (Choose all that apply.)

A. You can share the app with individual users.

B. You can grant Co-owner permission to a security group if you created the app from within a solution

C. The Co-owner permission is not available when sharing the app with individual users.

D. You can share the app with a Microsoft Azure Active Directory security group.

Correct Answer: AD

After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it. Specify each user by name, or specify a security group in Azure Active Directory.

Reference: https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app

QUESTION 5

HOTSPOT

You need to create a model-driven app without using code.

Which tools should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement	Tool
Select the forms and views that the app will use.	▼ Site Map designer / Solution Explorer / App designer / Entity view
Design the navigation for the app.	▼ Site Map designer / Dynamics 365 Admin center / Microsoft Azure DevOps

Correct Answer:

Answer Area

Requirement	Tool
Select the forms and views that the app will use.	▼ Site Map designer / Solution Explorer / **App designer** / Entity view
Design the navigation for the app.	▼ **Site Map designer** / Dynamics 365 Admin center / Microsoft Azure DevOps

Box 1: App designer

As an app maker, you can create and edit public views by using Power Apps.

Box 2: Site Map designer

Site maps define the navigation for your app. Create a site map for your app with ease by using the tile-based site map designer.
