QUESTION 1

HOTSPOT

You are configuring security to enable users to analyze data by using Microsoft Excel templates.

You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

The screenshot shows the 'Security role: TemplateAdministrator' configuration page in Power Apps. The interface includes a top navigation bar with 'Power Apps' and a menu with 'File', 'Save and Close', 'Actions', and 'Help'. Below the title bar, there are tabs for 'Details', 'Core Records', 'Marketing', 'Sales', 'Service', 'Business Management', 'Service Management', 'Customization', 'Missing Entities', 'Business Process Flows', and 'Custom Entities'. The main content area is a table with columns for 'Entity', 'Create', 'Read', 'Write', 'Delete', 'Append', 'Append To', 'Assign', and 'Share'. The table lists various entities and their permissions, with icons indicating the type of entity (User, Business Unit, Parent: Child Business Unit, or Organization). Below the table, there are sections for 'Privacy Related Privileges' and 'Miscellaneous Privileges', each with a list of specific permissions and their status (checked or unchecked). A 'Key' section at the bottom explains the icons used in the table.

| Entity | Create | Read | Write | Delete | Append | Append To | Assign | Share |
|------------------------------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|----------------------------------|
| Business Unit | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | | |
| Channel Property Group | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | | |
| Currency | <input type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | | |
| Document Template | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | | |
| Mailbox Auto Tracking Folder | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Organization | | <input checked="" type="radio"/> | <input type="radio"/> | | | <input type="radio"/> | | |
| Personal Document Template | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> | <input checked="" type="radio"/> |

Privacy Related Privileges
 Enabling these privileges will allow users to extract customer data from Microsoft Dynamics 365. For more information, review the corresponding user documentation.

| | | | |
|---------------------|----------------------------------|----------------------------------|----------------------------------|
| Document Generation | <input checked="" type="radio"/> | Dynamics 365 for mobile | <input checked="" type="radio"/> |
| Export to Excel | <input type="radio"/> | Go Offline in Outlook | <input checked="" type="radio"/> |
| Mail Merge | <input checked="" type="radio"/> | Print | <input checked="" type="radio"/> |
| Sync to Outlook | <input checked="" type="radio"/> | Use Dynamics 365 App for Outlook | <input checked="" type="radio"/> |

Miscellaneous Privileges

| | | | |
|-------------------------------|-----------------------|---|-----------------------|
| Act on Behalf of Another User | <input type="radio"/> | Approve Email Addresses for Users or Queues | <input type="radio"/> |
| Assign manager for a user | <input type="radio"/> | Assign position for a user | <input type="radio"/> |
| Assign Territory to User | <input type="radio"/> | Bulk Edit | <input type="radio"/> |

Key

- None Selected
- User
- Business Unit
- Parent: Child Business Unit
- Organization

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

You need to ensure that User1 can see the pre-configured example templates. Which permission should you change?

QUESTION 2

HOTSPOT

You need to resolve the issues found during testing.

Which option should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

| Issue | Option | | | |
|---|--|-----------------------|----------------------|-----------------------|
| Testers see all time entries. | <div data-bbox="975 1066 1465 1122">▼</div> <table border="1"><tr><td data-bbox="975 1122 1369 1167">Hierarchical security</td></tr><tr><td data-bbox="975 1167 1257 1211">Security group</td></tr><tr><td data-bbox="975 1211 1219 1256">Security role</td></tr></table> | Hierarchical security | Security group | Security role |
| Hierarchical security | | | | |
| Security group | | | | |
| Security role | | | | |
| Testers are able to edit existing time entries. | <div data-bbox="975 1294 1465 1350">▼</div> <table border="1"><tr><td data-bbox="975 1350 1289 1395">Control property</td></tr><tr><td data-bbox="975 1395 1337 1440">Field-level security</td></tr><tr><td data-bbox="975 1440 1219 1485">Security role</td></tr></table> | Control property | Field-level security | Security role |
| Control property | | | | |
| Field-level security | | | | |
| Security role | | | | |
| Managers cannot see required information. | <div data-bbox="975 1518 1465 1574">▼</div> <table border="1"><tr><td data-bbox="975 1574 1417 1619">Access team template</td></tr><tr><td data-bbox="975 1619 1342 1664">Field-level security</td></tr><tr><td data-bbox="975 1664 1374 1709">Hierarchical security</td></tr></table> | Access team template | Field-level security | Hierarchical security |
| Access team template | | | | |
| Field-level security | | | | |
| Hierarchical security | | | | |

Correct Answer:

Answer Area

Issue

Option

Testers see all time entries.

| | |
|-----------------------|---|
| | ▼ |
| Hierarchical security | |
| Security group | |
| Security role | |

Testers are able to edit existing time entries.

| | |
|----------------------|---|
| | ▼ |
| Control property | |
| Field-level security | |
| Security role | |

Managers cannot see required information.

| | |
|-----------------------|---|
| | ▼ |
| Access team template | |
| Field-level security | |
| Hierarchical security | |

Box 1: Security role

Scenario: Employees must only be able to access their own time tracking records from the app.

Testers report that they can see time entries in the Time Tracker app, not just their own.

Box 2: Field-level security

Scenario: Employees must only be able to modify time records for the current and previous day.

Testers report that they can edit any existing time entries.

Box 3: Hierarchical security

You use field security tables to apply field-level security, which restricts field access to specified users and teams.

QUESTION 3

You create a dashboard in Power BI. You share the dashboard with the sales team.

Sales team members report that they can see information for the entire company.

You need to ensure that the team is able to see only data for their team.

Where must you configure this restriction?

- A. Dashboard
- B. Report
- C. Dataset
- D. Settings

Correct Answer: C

Restrict access to the dataset.

Note: Another way of setting access is through manage permission in the dashboard, report, or dataset. If you share a dashboard, by default the report and the dataset will also be shared as read-only for users.

Reference:

<https://radacad.com/dashboard-sharing-and-manage-permissions-in-power-bi-simple-but-useful>

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

| Field name | Data type | Criteria for follow up |
|---------------------------|--------------|------------------------|
| Name | Text | No |
| Degree | Text | Yes |
| First available hire date | Date | Yes |
| Initial impression | Integer 0-10 | Yes |
| Resume | Picture | No |
| Not currently viable | Boolean | Yes |
| Follow up | Boolean | NA |

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-

up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a business rule on the appropriate data entity with a scope of entity.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

QUESTION 5

You are preparing to design a solution that makes use of Microsoft Teams and Power Platform.

The Sales team has a Sales Log workbook, which stores Requests for quotes, that has to be converted to a Common Data Service database.

The Sales team has their own Teams channel. You have been informed that the Sales dashboard must exist in the Sales channel and should contain data regarding the following:

1.

Active quotes.

2.

Sales pipeline.

3.

Year-to-date sales KPIs for sales quotas by region.

You have also been informed that Sales-related documents should be stored in folders in the Sales channel's file location, and that document versioning will be enabled.

You need to create the visualizations for the Sales dashboard.

You make use of both Power BI Desktop, and Power BI Service.

Does the action achieve your objective?

A. Yes, it does

B. No, it does not

Correct Answer: A
