QUESTION 1

You need to configure permissions for the Purchase order quantity flow.

Which permission should you assign?

- A. Co-owner
- B. Run-only user
- C. Owner
- D. User

Correct Answer: B

To configure permissions for the Purchase order quantity flow, you should assign the run-only user permission to the finance clerk. This will allow them to run the flow without being able to edit or share it. The other permissions are not suitable for this scenario because:

1.

Co-owner permission would give the finance clerk full access to edit, share, and delete the flow, which is not necessary or desirable.

2.

Owner permission would transfer the ownership of the flow to the finance clerk, which would remove your access and control over it.

3.

User permission would not allow the finance clerk to run the flow at all, only to view it.

QUESTION 2

You plan to use a cloud flow.

The flow must be contained within a solution.

You need to add the cloud flow to a solution.

Solution: Add an existing cloud flow from a managed solution to a new unmanaged solution.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other.

You must minimize the amount of processing time require to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create a parallel branch for the two Update Row actions.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

QUESTION 4

You are creating a custom connector to support invoice automation. You connect a Power Automate flow to the custom connector and successfully authenticate.

When you test the flow, you observe that several actions are missing from the custom connector.

You need to update the custom connector settings.

What should you do?

- A. Change the connection name.
- B. Set the action visibility option to None.
- C. Change the parameter drop-down type to Static.
- D. Set the action visibility option to Internal.
- E. Add an action description value.

Correct Answer: B

Leave the Visibility property set to none. This property for operations and parameters in a logic app or flow has the following options:

none: displayed normally in the logic app or flow advanced: hidden under another menu internal: hidden from the user important: always shown to the user first

QUESTION 5

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other.

You must minimize the amount of processing time required to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create a switch condition.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B
