**QUESTION 1**

You create an unattended Office 365 automation. The automation stops running.

You suspect that the runtime identity used by the automation caused the automation to stop running.

Which two issues can the runtime identity cause in this scenario?

Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. The automation is attempting to open files that cannot be opened or edited based on per-user access permissions
- B. The automation is not set up to handle an additional sign-in UI element.
- C. The unattended automation process suppressed an alert that was generated.
- D. The location of a specific user interface element has changed.

Correct Answer: AB

**QUESTION 2**

DRAG DROP

You are developing automation solutions for a company.

You plan to use Process advisor to gain a better understanding of business processes.

You need to select the process types to use to meet the company's requirements.

Which process types should you use? To answer, drag the appropriate process types to the correct requirements. Each process type may be used once, more than once, or not at all. You may need to drag the split bar between panes or

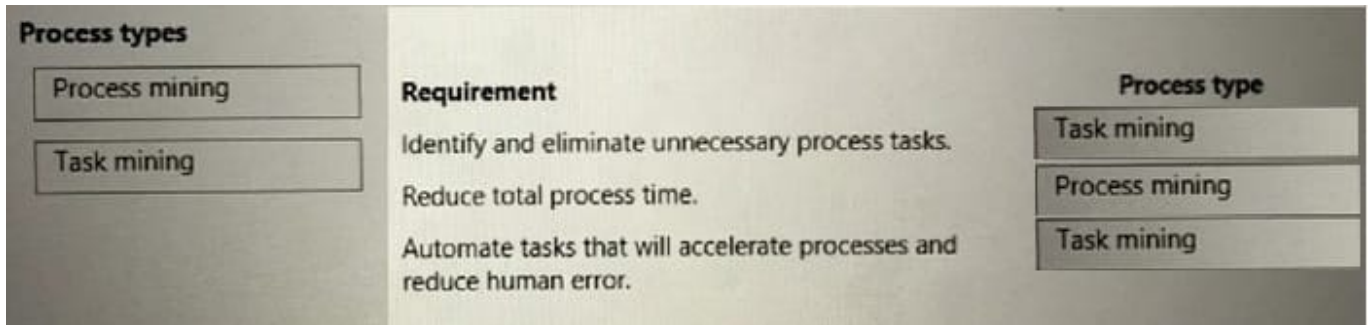

scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Process types	Requirement	Process type
Process mining	Identify and eliminate unnecessary process tasks.	Process type
Task mining	Reduce total process time.	Process type
	Automate tasks that will accelerate processes and reduce human error.	Process type

Correct Answer:

### QUESTION 3

A company uses activity logging to measure performance for invoice processing.

Users report that the data analytics department takes too long to manually analyze data. The company requires an automatic process to speed up activity log analysis and provide insights.

You need to select the Microsoft Power Platform feature to meet the company requirement.

Which feature should you select?

- A. Power Automate for cloud
- B. Process mining
- C. Task mining
- D. Power Automate for desktop

Correct Answer: B

### QUESTION 4

DRAG DROP

A company publishes a list of contacts each day as an HTML table on a web page. The company has a customer relationship management (CRM) application that runs on employee desktop devices.

You need to implement an RPA solution that reads data from the HTML table and create records in the CRM application.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

- Launch a new web browser instance.
- Use the Get details of element on web page action to read data from the HTML table into a variable.
- Use the Run application action to start the CRM application.
- Use the Extract data from web page action to read data from the HTML table into a variable.
- Use a dynamic selector to save data from the HTML table into a variable.
- Use a For each loop to write data from the variable to the CRM application.

**Answer Area**

[Four empty green bars for writing the answer]

Correct Answer:

**Actions**

- Launch a new web browser instance.
- Use the Get details of element on web page action to read data from the HTML table into a variable.
- Use the Run application action to start the CRM application.
- Use the Extract data from web page action to read data from the HTML table into a variable.
- Use a dynamic selector to save data from the HTML table into a variable.
- Use a For each loop to write data from the variable to the CRM application.

**Answer Area**

- Launch a new web browser instance.
- Use the Extract data from web page action to read data from the HTML table into a variable.
- Use the Run application action to start the CRM application.
- Use a For each loop to write data from the variable to the CRM application.

**QUESTION 5**

**HOTSPOT**

You develop automation solutions for a company.

You need to package the solutions.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Solution type
Share the solution with a colleague who uses a personal development environment.	<input type="checkbox"/> managed <input type="checkbox"/> unmanaged
Deploy the final solution to a production environment and prevent further development.	<input type="checkbox"/> managed <input type="checkbox"/> unmanaged

Correct Answer:

Requirement	Solution type
Share the solution with a colleague who uses a personal development environment.	<input checked="" type="checkbox"/> managed <input type="checkbox"/> unmanaged
Deploy the final solution to a production environment and prevent further development.	<input type="checkbox"/> managed <input checked="" type="checkbox"/> unmanaged
