QUESTION 1

You are building a project mgmt app. According to the design given to you, a project must store info regarding the various functional modules under it. Each functional module must store info regarding responsibility assigned to each developer. Info about the responsibility must have info about the due date and status.

What could be the most optimal model to achieve this?

- A. Create a Project object then Modules as a child object. Add Tasks to Modules.
- B. Create a Project then add Tasks to it. Define Modules as a field on Task.
- C. Create Project, Module, Responsibility as parent, child and grandchild objects.
- D. Create Project and Module objects then Responsibility as a junction object.

Correct Answer: A

QUESTION 2

Northern Trail Outfitters has two custom objects that are part of a master-detail relationship. What determines the ownership and sharing access of the detail record?

- A. The default owner is set in the parent object's settings.
- B. The Owner field on the Detail record.
- C. The Owner field on the Master record.
- D. The owner is set independently on the detail object's settings.

Correct Answer: C

QUESTION 3
