#### QUESTION 1

Which of the following statements regarding mapplets are correct and true?

- A. A mapplet can contain a target definition
- B. A mapplet can contain a source definition as well as a source qualifier
- C. Every mapplet must have at least 1 Input transformation as well as 1 Output transformation
- D. A mapplet can contain a Normalizer transformation

Correct Answer: B

---

#### QUESTION 2

Please choose one of the following. In a static, non-multi-row lookup,

- A. If a lookup search does not find a value in the search data, then the row from which the search is produced is dropped so a balanced pipeline can be produced
- B. If a lookup search finds the search value in the lookup data but discovers that the fields that are being returned from the search are null, then the row from which the search is produced is dropped so that a balanced pipeline can be produced
- C. If the lookup finds two records that match the search key, it will return two records
- D. None of the above

Correct Answer: D

---

#### QUESTION 3

Referring to the Lookup transformation, which statement is correct and true?

- A. The lookup condition defines how much memory each of the two caches will consume
- B. The lookup condition defines the fields that are used in the search of the data
- C. The lookup condition is limited to only the equal operator
- D. The lookup condition is designated in the ports tab interface via the "L" check box

Correct Answer: B

---

#### QUESTION 4

An Update Strategy transformation has the Forward Rejected Rows attribute unchecked. Which statement is correct and true?

- A. Records that are tagged for rejection are projected downstream to the next transformation so long as the ports are connected properly
- B. Records that are tagged for rejection are dropped and not projected downstream to the next transformation
- C. The Forward Rejected Rows attribute cannot be cleared after the transformation is created
- D. The Forward Rejected Rows attribute is only applicable when records are tagged for rejection upstream of the Update Strategy transformation

Correct Answer: B

---

**QUESTION 5**

Which attributes of a reusable Expression transformation can be edited within the Mapping Designer workspace?

- A. The transformation's name, one of its port's default values, the tracing level or a Metadata Extension
- B. The transformation's name or the tracing level
- C. The transformation's name, one of its port's default values or the tracing level
- D. The transformation's name is the only attribute that can be changed

Correct Answer: B
