QUESTION 1

What are three unique benefits of the Palo Alto Networks Content-ID? (Choose three.) Select 3 Correct Responses

A. micro-segmenting network traffic based on the unique identification number of the content

B. increasing latency as new threat prevention features are enabled

C. detecting and preventing known and unknown threats in a single pass

D. enforcing policy control over unapproved web surfing

E. proactively identifying and defending against unknown, new, or custom malware and exploits

Correct Answer: CDE

QUESTION 2

The Security Operations Center (SOC) has noticed that a user has large amounts of data going to and coming from an external encrypted website. The SOC would like to identify the data being sent to and received from this website.

Which Secure Sockets Layer (SSL) decryption method supported by Palo Alto Networks would allow the SOC to see this data?

A. Forward Proxy

B. Web Proxy

C. Certificate Proxy

D. Inbound Proxy

Correct Answer: A

QUESTION 3

A Human Resources (HR) application has the URL of https://hr.company.com:4433/.

How should the "Service" column of the Security policy be set to match and permit this application?

A. Define and then select a new custom Transmission Control Protocol (TCP) service with port 4433.

B. Edit "service-https" to use port 4433.

C. Set to "service-http".

D. Set to "application-defaults," which will locate and match the HR application.

Correct Answer: A
