QUESTION 1

Which two OpenStack components areused in the creation of a VM-Series firewall from a heat template in OpenStack? (Choose two)

A. Swift creates the storage resources.

B. Nova creates the firewall instance.

C. Horizon

D. Neutron creates the network resources.

Correct Answer: AC

QUESTION 2

What is the major decision factor that customers use when selecting a managed container platform such as AS/EKS/GKE?

A. licensing costs

B. enhanced capabilities not available in vanilla K8s

C. no need to manage containers, just the application code.

D. reduced operational costs and management overhead

Correct Answer: B

QUESTION 3

Is vulnerability analysis against images in the registry sufficient for security?

A. Yes, containers do not have unique vulnerabilities.

B. No, you should do vulnerability analysis only against the running containers, which are vulnerable.

C. Yes, you are ensuring that the images the containers are based on are secure.

D. No, you need to do analysis in the CI system, in the registry, and against instantiated containers

Correct Answer: C

QUESTION 4

Which two methods provide a virtual IP address when implementing active/active HA? (Choose two)

A. VRRP

B. HSRP

C. floating IP address

D. ARP load sharing

Correct Answer: CD

QUESTION 5

How does Palo Alto Networks integrate with VXLAN tagging?

A. does not integrate with VXLAN tagging, so virtual appliances cannot be provided, but hardware appliances can be offered at the data center gateway border

B. integrates with VXLAN. but scripting is necessary, and Professional Services should be engaged

C. integrates fully into VXLAN architectures if they are provided by VMware

D. does not integrate natively with VXLAN tagging, network equipment can convert VXLAN flows to VLANs and send those VLANs to Palo Alto Networks firewalls

Correct Answer: C
