D. Sheet 1: Dashboard with a KPI visualization of total print jobs, and a bar chart with print jobs by region Sheet 2: Details page that shows the daily print jobs in a table Sheet 3: Details page that shows the daily print jobs

Correct Answer: B

QUESTION 3

A marketing team needs to analyze current sales by age groups in a bar chart. The following age groups are created in the data manager, and the field is named AgeGroup:

Children: 16 years old and younger

YoungAdult: 17 to 30 years old

Adult: 31 years old and older

The business analyst will use an expression to set the colors for the bars:

```
If ([AgeGroup] = `Children`, Red(), If ([AgeGroup] = `YoungAdult`, Blue(), Green()))
```

Which steps must be completed to apply the correct colors in the visualization?

A. Select Data in the properties panel and create a calculated dimension using the expression editor.

B. Create a master item dimension using the expression, in the visualization, select Color by dimension and use the newly created master item.

C. Under Appearance in the properties panel, select Color, then select Color by expression, and make sure that The expression is a color code is checked.

D. Create a master item measure using the expression. In the visualization, select Color by measure and use the newly created master item.

Correct Answer: B
