100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by SOA Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

My service was consuming too much memory so I chose to persist data between invocations to a database. After doing so, I found that the performance of my service declined significantly due to the fact that my database is shared with other applications. As a result, I further isolated the service by giving it its own dedicated database. Which service-orientation principles were involved in this scenario? Select the correct answer.

- A. Service Loose Coupling
- B. Service Reusability
- C. Service Autonomy
- D. Service Statelessness

Correct Answer: CD

---

**QUESTION 2**

Which of the following statements describes service re-composability, as it relates to the Service Composability principle? Select the correct answer.

- A. I have a service that is part of a service composition.
- B. I have a service composition with 5 services.
- C. I have a service that is part of 2 service compositions.
- D. I have 2 service compositions that are part of 2 service inventories

Correct Answer: C

---

**QUESTION 3**

Besides the Standardized Service Contract principle, which of the following service-orientation principles are also primarily focused on the design of the service contract? SELECT ALL THAT APPLY

- A. Service Autonomy
- B. Service Statelessness
- C. Service Discoverability
- D. Service Abstraction

Correct Answer: CD

---

**QUESTION 4**

When applying the Service Loose Coupling design principle, we want to \_\_\_\_\_ the coupling between the service contract and service consumers and \_\_\_\_\_ the coupling of the service contract to its underlying logic.

Select the correct answer.

- A. reduce, reduce
- B. reduce, increase
- C. increase, reduce
- D. increase, increase

Correct Answer: A

---

#### QUESTION 5

A service contract publishes information that makes guarantees about how the service will behave at runtime and when it will be available. These types of guarantees are associated with which service meta information type? Select the correct answer.

- A. technology
- B. programmatic
- C. functional
- D. quality of service

Correct Answer: D
