QUESTION 1

One SOA type can inherit the features and limitations of another SOA type with a broader scope. For example, the environment and conventions established by the service-oriented enterprise architecture can be carried over into individual service inventory architectures.

- A. True
- B. False

Correct Answer: A

QUESTION 2

The Process Centralization pattern is a part of which compound pattern?

- A. Enterprise Service Bus
- B. Orchestration
- C. Federated Endpoint layer
- D. Official Endpoint layer

Correct Answer: B

QUESTION 3

For a given service inventory architecture you would choose between an enterprise service bus product or an orchestration product, but you would not use both together.

- A. True
- B. False

Correct Answer: B

QUESTION 4

Which of the following statements are false?

- A. The application of the Policy Centralization pattern decreases the governance burden required to ensure that common policies are kept synchronized over time.
- B. The application of the Policy Centralization pattern increases the amount of policy content in the service inventory.
- C. The application of the Policy Centralization pattern combines global and domain- specific policies into a single location. As a result, the distinction between a global and domain policy is eliminated.

D. The application of the Policy Centralization pattern requires that policies only be expressed with the WS-Policy standard.

Correct Answer: BCD

QUESTION 5

The application of the Legacy Wrapper pattern typically results in:

- A. no coupling of the wrapper service logic to the legacy system
- B. no coupling of the wrapper service logic to the service contract
- C. no coupling of the service consumer to the legacy system encapsulated by the wrapper service
- D. no coupling of the service logic to the service contract

Correct Answer: C
