Implementation notes
This action hasn't been implemented yet. Refer to the implementation instructions for this action.

[Edit implementation details](#)

How to implement
Microsoft recommends that your organization enable self-service password reset to allow users who have either forgotten their password or whose account has been locked out as a result of malicious attempts, using an alternate factor to reset their password without the assistance of the help desk.

How to Use Microsoft Solutions to Implement
Your organization can use Azure Active Directory (Azure AD) to give users the ability to change or reset their password with no administrator or help desk involvement. Select **Launch Now** to enable Self-Service Password Reset (SSPR) by selecting "All" or "Selected" on the "Properties" page to determine applicable users.
