QUESTION 1

Which Azure Active Directory (Azure AD) feature can you use to restrict Microsoft Intune-managed devices from accessing corporate resources?

A. network security groups (NSGs)

B. Azure AD Privileged Identity Management (PIM)

C. conditional access policies

D. resource locks

Correct Answer: C

QUESTION 2

In the Microsoft Cloud Adoption Framework for Azure, which two phases are addressed before the Ready phase? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Plan

B. Manage

C. Adopt

D. Govern

E. Define Strategy

Correct Answer: AE

QUESTION 3

DRAG DROP

Match the types of compliance score actions to the appropriate tasks.

To answer, drag the appropriate action type from the column on the left to its task on the right. Each type may be used once, more than once, or not at all.
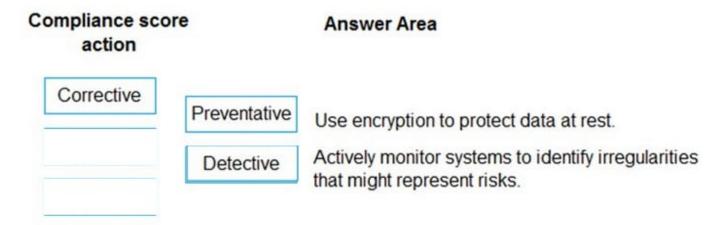

NOTE: Each correct match is worth one point.

Select and Place:

Compliance score action

Corrective

Detective

Preventative

Answer Area

Use encryption to protect data at rest.

Actively monitor systems to identify irregularities that might represent risks.

Correct Answer:

Compliance score action

Corrective

Answer Area

Preventative — Use encryption to protect data at rest.

Detective — Actively monitor systems to identify irregularities that might represent risks.

Box 1: Preventative

Preventative actions address specific risks. For example, protecting information at rest using encryption is a preventative action against attacks and breaches. Separation of duties is a preventative action to manage conflict of interest and

guard against fraud.

Box 2: Detective

Detective actions actively monitor systems to identify irregular conditions or behaviors that represent risk, or that can be used to detect intrusions or breaches. Examples include system access auditing and privileged administrative actions.

Regulatory compliance audits are a type of detective action used to find process issues.

Incorrect:

Corrective actions try to keep the adverse effects of a security incident to a minimum, take corrective action to reduce the immediate effect, and reverse the damage if possible. Privacy incident response is a corrective action to limit damage

and restore systems to an operational state after a breach.

QUESTION 4

What should you use in the Microsoft 365 security center to view security trends and track the protection status of identities?

A. Attack simulator

B. Reports

C. Hunting

D. Incidents

Correct Answer: B

Reference: https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/reports-and-insights-in-security-and-compliance?view=o365-worldwide

---

QUESTION 5

What can you protect by using the information protection solution in the Microsoft 365 compliance center?

A. computers from zero-day exploits

B. users from phishing attempts

C. files from malware and viruses

D. sensitive data from being exposed to unauthorized users

Correct Answer: D
