QUESTION 1

A user at Universal Containers would like to give access to a Report folder to someone else in the organization.

Which two access permissions should the user have to support this requirement?

Choose 2 answers.

A. The "Viewer" Report folder permission

B. The "Editor" Report folder permission.

C. The "Manage Reports in Public Folders" Profile permission.

D. The "Manager" Report folder permission.

Correct Answer: CD

QUESTION 2

When writing test methods, what functionality is verified by the system method "runAs()"?

A. Enforcement of a user\'s record sharing.

B. Enforcement of user permissions.

C. Enforcement of a user\'s field-level security.

D. Enforcement of user\'s public group assignments.

Correct Answer: A

QUESTION 3

Universal Containers (UC) uses a custom Visualforce page to display shipment tracking information (custom object, private OWD) to field manager and agents. The IT team wants to make sure that users have access to only the information that is allowed.

Which Apex method must be used to make sure only allowed fields are shown to the users?

A. isReadable()

B. isShowable()

C. isAccessible()

D. isViewable()

Correct Answer: C

QUESTION 4

Universal Containers (UC) service reps are assigned to a profile which has "View All" in Case object (Private OWD). To make sure service reps have access to all relevant information to attend to customer requests, which two details should a

salesforce Architects consider?

Choose 2 answers:

A. Service reps will be able to access all UC contact records if they are controlled by parent.

B. Service reps will not be able to access all UC contact records if they are controlled by parent.

C. Service reps will be able to access all the UC Account records due to Implicit Sharing.

D. Service reps will not be able to access all the UC Accounts records because Account OWD is private.

Correct Answer: BD

How can an architect achieve this https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_perms_enforcing.htm Example: To check the field-level read permission of the contact\\'s email field before querying

for this field:

if (Schema.sObjectType.Contact.fields.Email.isAccessible()) { Contact c = [SELECT Email FROM Contact WHERE Id= :Id]; }

Answer for B https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_keywords_sharing.htm The "with sharing" keyword allows you to specify that the sharing rules for the current user are considered for the class. You have to explicitly set this keyword for the class because Apex code runs in system context. In system context, Apex code has access to all objects and fields-- object permissions, field-level security, sharing rules aren\\'t applied for the current user. This strategy ensures that code doesn\\'t fail to run because of hidden fields or objects for a user.

QUESTION 5

Assuming granular locking is enabled, what activity can happen in parallel to changing a community account owner without risking group membership lock errors?

A. Deletion of a Role

B. Creation of a Role

C. Creation of a Territory

D. Deletion of a Territory

Correct Answer: C
