### QUESTION 1

Which two objects support creating queues?

Choose 2 answers.

- A. Account.
- B. Opportunity.
- C. Lead.
- D. Case.

Correct Answer: CD

---

### QUESTION 2

What is the security vulnerability in the following code snippet?

Value of my Textfield is

- A. SOQL Injection
- B. Arbitrary Redirects
- C. Cross-Site Scripting
- D. Access Control

Correct Answer: C

---

### QUESTION 3

Universal Containers would like to control access to records and objects according to the following business requirements: Sales users can view all Account records but only edit their own records.

1.

Sales managers view all Account records but only edit records of the team.

2.

Service users can view all Account records that are not marked with a RecordType of Prospect. Which organization-wide default configuration should a Salesforce architect recommend to fulfill these requirements?

- A. Public Read Write
- B. Private
- C. Public Read Only

D. Public Read/Transfer

Correct Answer: C

---

#### QUESTION 4

Universal Containers (UC) has a mostly private organization-wide default (OWD), as it is a core principle of UC to respect client data privacy. UC has implemented complex processes for granting access to Opportunity data. A few key members of the Sales Reporting team need to always be able to see, but not change, Opportunity data for all Opportunities.

What should an architect recommend as an approach to meet these requirements?

- A. Create a Permission Set that grants "View All Data" Permission.
- B. Make Opportunity OWD read-only.
- C. Give "View All Data" Permission to the Sales Reporting Profile.
- D. Create a Permission Set that grants "View All" permission for Opportunity.

Correct Answer: D

---

#### QUESTION 5

Universal Containers requested to leverage Lightning Web Components (LWC) to improve support reps' user experience. LWC will be used as view layer, and Apex classes will have the business logic. Which attention points should the development team consider when implementing this solution?

- A. Once that Apex runs on system mode, the development team needs to enforce record visibility
- B. Create test classes including run As test different users accessing the data,
- C. Use is Shareable, is Editable, and is Creatable to enforce field permissions.

Correct Answer: A
