QUESTION 1

A user enabled for Vault Cache is unable to retrieve some archived items while disconnected from the network.

Which Vault Cache policy setting causes this behavior?

- A. Offline store required
- B. Prevent online retrieval
- C. Pre-emptive archiving in advance
- D. Store only items that user opens

Correct Answer: D

QUESTION 2

An administrator needs to remove an Index Server from an Index Server Group and place it in another group.

When can this process be completed?

- A. during the processing time of the Index Administration task
- B. before archived items have been indexed
- C. when the Indexing Service is stopped
- D. after indexes have been put into Backup mode

Correct Answer: B

QUESTION 3

The Enterprise Vault server is running out of disk space in a particular index location and the administrator wants to move some indexes to a new location.

How should the administrator move the indexes?

- A. manually move the Index files to the new location > run the "Synchronize" task
- B. use the "Index Volumes Browser" and choose the index volume > click the "Move" button
- C. run the "Change Location" task > manually copy the Index files to the new location
- D. manually move the Index files to the new location > change the path in the IndexServiceEntry table in the EV directory database

Correct Answer: C

QUESTION 4

Which administrative role allows viewing of Symantec Enterprise Vault 11.x reports?

- A. messaging administrator
- B. storage administrator
- C. power administrator
- D. report administrator

Correct Answer: C

QUESTION 5

An administrator has four Enterprise Vault servers (EVSERVER1, EVSERVER2, EVSERVER3 and EVSERVER4) configured for a building blocks configuration. EVSERVER4 belongs to a different Index Server Group.

Which two failover scenarios are possible? (Select two.)

- A. EVSERVER1 can be failed over to EVSERVER2
- B. EVSERVER1 can be failed over to EVSERVER4
- C. EVSERVER4 can be failed over to EVSERVER2
- D. EVSERVER1 and EVSERVER2 can be failed over to EVSERVER3 at the same time
- E. EVSERVER1 and EVSERVER2 can be failed over to EVSERVER4 at the same time

Correct Answer: AD
