QUESTION 3

Which of the following chart type makes use of 'binned' data?

- A. Gantt Chart
- B. Bullet chart
- C. Histogram
- D. Treemaps

Correct Answer: C

A histogram is a chart that displays the shape of a distribution. A histogram looks like a bar chart but groups values for a continuous measure into ranges, or bins.

The basic building blocks for a histogram are as follows:

Mark type:	Automatic
Rows shelf:	Continuous measure (aggregated by Count or Count Distinct)
Columns shelf:	Bin (continuous or discrete). <i>Note: This bin should be created from the continuous measure on the Rows shelf. For more information on how to create a bin from a continuous measure, see Create Bins from a Continuous Measure.</i>
