**QUESTION 1**

DRAG DROP

Match all five Veritas Cluster Server global cluster options on the left to the corresponding definitions on the right.

Select and Place:

<i>Options</i>		<i>Definitions</i>
<b>steward</b>		An agent that manages the inter-cluster lcmp and lcmpS communications.
<b>wide-area heartbeat</b>		A process that runs as a standalone binary on a system outside of the global cluster configuration and minimizes the possibility of a wide-area split-brain.
<b>authority</b>		A process that provides inter-cluster communications for the purpose of receiving and transmitting information about the status of the cluster objects.
<b>ClusterList</b>		A service group attribute that marks the service group as global and specifies on which clusters the service group is configured to run.
<b>wac</b>		A service group attribute that prevents a service group from coming online in multiple clusters at the same time.

Correct Answer:

<i>Options</i>		<i>Definitions</i>
		An agent that manages the inter-cluster lcmp and lcmpS communications.
<b>wide-area heartbeat</b>		A process that runs as a standalone binary on a system outside of the global cluster configuration and minimizes the possibility of a wide-area split-brain.
<b>steward</b>		A process that provides inter-cluster communications for the purpose of receiving and transmitting information about the status of the cluster objects.
<b>ClusterList</b>		A service group attribute that marks the service group as global and specifies on which clusters the service group is configured to run.
<b>wac</b>		A service group attribute that prevents a service group from coming online in multiple clusters at the same time.
<b>authority</b>		

**QUESTION 2**

During a Veritas Cluster Server startup procedure, GAB fails and the administrator receives the following message:

vcs:11032 registration failed. Exiting

Which two files should the administrator check to ensure proper configuration? (Select two.)

- A. main.cf
- B. gabtab
- C. inittab
- D. vxfentab
- E. llttab

Correct Answer: BE

**QUESTION 3**

Which requirement must an administrator meet prior to implementing an InfoScale Availability cluster that includes both physical and virtual machines?

- A. ensure all systems in the cluster have access to virtualized storage devices
- B. ensure shared storage supports SCSI3 persistent reservations
- C. ensure shared storage supports multi-pathing
- D. ensure the systems in the SystemList for a service group have access to the same shared storage devices

Correct Answer: B

---

**QUESTION 4**

Refer to the exhibit.

How many servers are seeded in the GAB port membership?

GAB status and membership notation

```
# gabconfig -a
GAB Port Memberships
-----
Port a gen f7c001 membership 01 ; ;12
Port b gen f7c004 membership 01 ; ;12
Port h gen f7c002 membership 01 ; ;12
```

- A. the GAB port membership has two nodes: 01 and 12
- B. the GAB port membership has three nodes: 0,1, and 12
- C. the GAB port membership has two nodes: 0 and 1
- D. the GAB port membership has four nodes: 0,1,21, and 22

Correct Answer: C

#### QUESTION 5

An installed cluster has been licensed with the keyless licensing option. The administrator has yet to configure the cluster to be managed by Veritas InfoScale Operations Manager (VIOM). What will happen when 60 days have passed since installation?

- A. The cluster will shut down.
- B. The cluster will log messages related to licensing.
- C. The cluster will disallow administrative changes until licensed.
- D. The cluster will cease to respond if a resource faults.

Correct Answer: B
