- A. NetBackup Management > Host Properties > Media Servers > Scalable Storage
- B. NetBackup Management > Host Properties > Master Servers > Scalable Storage
- C. NetBackup Management > Host Properties > Master Servers > Cloud Storage
- D. NetBackup Management > Host Properties > Media Servers > Cloud Storage

Correct Answer: C

---

**QUESTION 3**

An administrator has created a new policy to back up Windows clients, and has created a single automatic schedule. On the scheduled date, the administrator notices that the backup job fails to launch automatically as expected.

Which debug log file should the administrator view to determine why the backup job failed to launch?

- A. nbpem
- B. nbjm
- C. nbrb
- D. nbemm

Correct Answer: A

---

**QUESTION 4**

Which platform is unsupported as a platform for the VMware backup host?

- A. Solaris 11
- B. Windows 2008
- C. SUSE Linux 11
- D. RedHat Linux 6

Correct Answer: A

---

#### QUESTION 5

The master server catalog is being recovered to a new server. The administrator receives the message displayed below:

```
Please insert the following media and run the volume configuration
wizard or the vmupdate command to update the NetBackup database.
Host - train1
MediaID - GBP847
Barcode - GBP847S1
```

```
Please insert the following media and run the volume configuration
wizard or the vmupdate command to update the NetBackup database.
Host - train1
MediaID - GBP178
Barcode - GBP178S4
```

In the NetBackup Administration Console, barcode GBP178S4 is associated with media ID P178S4. How should the administrator proceed?

- A. use bplabel to change the media ID > re-inventory the library > perform recovery
- B. use nbdelete to remove the media id > use vmadd to re-add the media id > re-inventory the library > perform recovery
- C. delete the tape > set the media ID generation rule accordingly > re-inventory the library > run recovery
- D. delete the tape > set the barcode rule accordingly > re-inventory the library > run recovery

Correct Answer: C
