QUESTION 1

Upon arriving at work on a Monday, an administrator sees several replication jobs that have failed with the following error message:

no images were successfully processed

Which two reasons may be the cause for the error code? (Choose two.)

- A. The checkpoint restart is disabled for the replication jobs.
- B. There are network connectivity issues between the source and target domains.
- C. The NetBackup host ID-based certificate was revoked.
- D. There is insufficient storage space on the target storage server.
- E. There are insufficient tapes in the replication volume pool.

Correct Answer: BD

QUESTION 2

Which two actions should an administrator take to allow NetBackup to automatically manage the allocation of volumes to volume pools? (Choose two.)

- A. define a scratch pool and add all of the volumes to it.
- B. assign volumes to all volume pools as required in the environment.
- C. assign volumes to a standalone volume group.
- D. create volume pools as required, but refrain from adding volumes to the pools.
- E. assign volumes to the NetBackup volume pool.

Correct Answer: AD

QUESTION 3
