QUESTION 1

An administrator is unable to proceed with the configuration of disk storage on a second disk on the Backup Exec server.

What could be the possible reason?

A. The disk has unformatted partitions.

B. The disk is initialized, but partitions need to be created.

C. The disk is already used as a Backup Exec disk storage.

D. The disk has a volume configured, but needs to have a drive letter assigned.

Correct Answer: D

QUESTION 2

An administrator needs to use Symantec Backup Exec 2014 to protect a VMware environment. The data store containing the VMware virtual machines is located on SAN disk storage. The Symantec Backup Exec 2014 server is also connected to the SAN infrastructure. The administrator needs to restrict the flow of backup data such that it always travels over the SAN.

How should the administrator proceed?

A. enable forced SAN mode on the VMware vCenter server

B. select the NBD transport option in backup properties

C. use the transport mode priority list option to only select SAN transport mode

D. enter the IP Address of the SAN data storage server

Correct Answer: C

QUESTION 3

When is the Install Device Drivers Option unavailable in the Configure Storage wizard?

A. when Backup Exec detects hardware that is unsupported

B. when Backup Exec detects that device drivers are already installed

C. when Backup Exec is installed on a Windows 2003 or earlier operating system

D. when Backup Exec is installed on a Windows 2012 or later operating system

Correct Answer: D

QUESTION 4

What is a capability of the Symantec Backup Exec 2014 Agent for VMware and Hyper-V?

A. it enables granular recovery of GUID Partition Table (GPT) volumes on virtual machines

B. it enables image-level protection of virtual machines with physical Raw Device Mapping (RDM) volumes

C. it can only back up virtual machines when they are powered on

D. it supports agentless virtual machine backup and complete recovery of guest virtual machines

E. It shuts down and restarts virtual machines to consistently backup the content.

Correct Answer: D

QUESTION 5

Which action must an administrator take to properly restore System State on a live Windows web server?

A. Restore System State in Safe mode

B. Restore System State in Directory Services Restore mode

C. Restore System State and reboot the server

D. Reboot the server before the restore of System State

E. restore System State with the option to Mark this server as the primary arbitrator

Correct Answer: C
