**QUESTION 1**

In which scenario should an administrator choose to use the faster processing method for Hyper-V backups?

- A. The administrator wants to use full and incremental backup methods.
- B. The administrator wants to use full and differential backup methods.
- C. The Hyper-V host being protected is running Windows Server 2008 R2.
- D. The Hyper-V host has limited space for checkpoints.

Correct Answer: A

---

**QUESTION 2**

An administrator has a Central Admin Server (CAS) that was recently upgraded from Backup Exec 2014 to Backup Exec 16 that is displaying the following message: Database Encryption Key Has Not Been Created

What is a possible reason for the message?

- A. A Database Encryption Key is unnecessary for Backup Exec 16 Central Admin Servers (CAS).
- B. Some of the Managed Backup Exec Servers (MBES) have yet to be upgraded to Backup Exec 16.
- C. The CAS was upgraded before the MBES, causing the Database Encryption Key creation to fail.
- D. An export location for the Database Encryption Key has yet to be defined in the CAS settings.

Correct Answer: C

---

**QUESTION 3**

Backup Exec allows administrators to make copies of deduplicated backup sets and transfer them to a different Backup Exec 2014 server. The transfer process is optimized, meaning only unique blocks (those not already contained in the deduplication disk storage device of the destination server) are copied.

What is the proper name of this ability?

- A. optimized deduplication
- B. optimized replication
- C. optimized duplication
- D. optimized synchronization

Correct Answer: C

---

**QUESTION 4**

An administrator has several expired backup sets that are still showing under the configured Disk Storage. Which two reasons will prevent the expired backup sets from being deleted? (Select two.)

- A. There are other unexpired backup sets that are dependent on them.
- B. The expired backup sets need to be duplicated before they will be deleted.
- C. The expired backup sets are part of a (Simplified Disaster Recovery) SDR-enabled backup.
- D. The expired backup sets have to be overwritten by a new backup job.
- E. The expired backup sets need to be manually deleted from the Backup Exec console.

Correct Answer: CE

---

**QUESTION 5**

Which two types of information are provided by Symantec Backup Exec 2014 catalogs? (Select two.)

- A. storage device properties
- B. searchable restore selections
- C. file deduplication metadata
- D. file and directory information on each backup set
- E. Symantec Backup Exec server properties

Correct Answer: BD
