QUESTION 1

Which of the following Veeam Backup and Replication jobs can be set up to support GFS retention? (Choose two.)

- A. Backup Copy
- B. Backup
- C. Backup to tape
- D. Replication
- E. Configuration Backup

Correct Answer: AB

QUESTION 2

A Veeam proxy server is configured as follows. No modifications are allowed to the transport mode.

Transport Mode

Backup proxy transport mode:

Automatic selection

Data retrieval mode is selected automatically by analyzing backup proxy configuration and reachable VMFS and NFS datastores. Transport modes allowing for direct storage access will be used whenever possible.

Direct storage access

Data is retrieved directly from shared storage, without impacting production hosts. For block storage, backup proxy server must be connected into SAN fabric via hardware or software HBA, and have VMFS volumes mounted.

Virtual appliance

Data is retrieved directly from storage through hypervisor I/O stack by hot adding backed up virtual disks to a backup proxy VM. Datastores containing protected VMs must be connected to a host running backup proxy VM.

Network

Data is retrieved from storage through hypervisor network stack using NBD protocol over host management interface. This mode has no special setup requirements. Recommended for 10 Gb Ethernet or faster.

Options

Failover to network mode if primary mode fails, or is unavailable

Enable host to proxy traffic encryption in Network mode (NBDSSL)

OK

Cancel

When performing a restore of a thin-provisioned VMware virtual disk on an NFS data store using this proxy server, what transport mode will be used by default?

- A. Direct SAN access
- B. Virtual appliance
- C. Network
- D. Direct NFS access

Correct Answer: D

QUESTION 3

If your mount server is running Windows Server 2019 and you are performing a secure restore, which statement below is true?

- A. NTFS is the only format supported.
- B. RefS will be skipped.
- C. RefS will be processed and scanned.
- D. Storage Spaces disks will be processed and scanned.

Correct Answer: A

QUESTION 4

A company has outgrown their current data center and plans to use the second data center as the new primary and needs to migrate their workloads. They are running VMware in both data centers.

Which steps would allow this migration to occur without any data loss?

- A. 1. Replication job
- 2. Failover plan
- 3. Permanent failover
- B. 1. Backup job
- 2. Instant VM Recovery
- 3. Finalize the Instant VM Recovery
- C. 1. Replication job
- 2. Failback
- 3. Commit failback
- D. 1. Replication job

2.

Planned failover

3.

Permanent failover

Correct Answer: D

QUESTION 5

A financial company is looking for a new backup application. One of their main requirements is the ability to have quick access to their backup data.

What features in Veeam Backup and Replication support the rapid availability of data, applications and VMs? (Choose three.)

- A. Full VM recovery without quick rollback
- B. Microsoft SQL database, and Oracle database publishing
- C. Instant VM Recovery
- D. Instant VM disk recovery
- E. Bare metal recovery
- F. Restore to Amazon EC2

Correct Answer: BCD
