- D. VMs grouped by vSphere tag
- E. VMs grouped by Folder
- F. VMs grouped by Veeam ONE business view category

Correct Answer: ADE

QUESTION 3

Which of the following are benefits of using DD Boost integration with Dell EMC Data Domain in Veeam Backup and Replication? (Choose three.)

- A. Lower network usage
- B. Enhanced synthetic full backup creation
- C. Support for Reverse Incremental Backup Mode
- D. Lower Recovery Time Objective (RTO)
- E. Managed File Replication leveraged by Backup and Replication for Backup Copy Jobs

Correct Answer: BCE

QUESTION 4

Which statement regarding Enterprise Manager is true?

- A. RESTful API is an optional feature.
- B. Only XML format is currently supported for RESTful API for resource representation.
- C. Users with Portal User role can access VMs from their restore scope in VMs and/or Files tab and generate reports as permitted by their settings.
- D. Restore scope can be customized if you have Enterprise Edition.
- E. Users with Restore Operator role can access VMs from their restore scope in VMs and/or Files tab, as well as reports for these VMs; they can also perform restore operations as permitted by their settings.

Correct Answer: A

QUESTION 5

Which of the following statements regarding Veeam Explorer for Sharepoint are true? (select three)

- A. The account used for working with Veeam Explorer for SharePoint requires membership in the sysadmin fixed server role on the staging Microsoft SQL Server.
- B. Veeam Explorer for SharePoint is able to restore Microsoft SharePoint items by using PowerShell cmdlets in any edition.
- C. Veeam Explorer for Sharepoint does not support Microsoft SharePoint Server Foundation editions - only Standard and Enterprise.
- D. The staging system must run the same or a later version of Microsoft SQL Server as the server that hosts restored Microsoft SharePoint content databases
- E. Veeam Explorer for Sharepoint is able to Restore to original location in all paid editions.
- F. The staging Microsoft SQL Server must run on the machine where Veeam Explorer for SharePoint is installed (that is, on the machine running Veeam Backup server).

Correct Answer: DEF
