QUESTION 1

During the initial meeting to plan a new Web site, whose input must be obtained?

- A. Shareholders
- B. Stakeholders
- C. Web developers
- D. Graphic designers

Correct Answer: B

QUESTION 2

Your company is investigating the possibility of moving its customer service management system to a cloud service provider. The sales rep for the cloud service provider has presented many advantages that would benefit your company. What would be a potential drawback of moving the CRM from your current in- house solution?

- A. If your company's Internet service is interrupted for any reason at any time, you will not have access to the CRM.
- B. More company employees will have access to the system, which could result in unauthorized access to confidential data
- C. Special equipment will need to be purchased and maintained in your office in order to access and maintain the CRM once it is migrated to the hosted cloud service.
- D. Migrating the CRM to the cloud service provider will eliminate several jobs in your customer service department because their job roles will no longer be required.

Correct Answer: A

QUESTION 3

When the user clicks the Submit Query button on a form, the browser sends the information entered in the form to the Web server as a raw text string. The basic element of a raw text string is a name=value pair. A CGI script parses and formats the raw text string into a human-readable format. Which attribute of the form field elements organizes information input by the user into name=value pairs?

- A. Type
- B. Name
- C. Value
- D. Input

Correct Answer: B

QUESTION 4

Correct Answer: A

QUESTION 7

The official CIW Web site has an IP address of 72.44.192.233. Which technology allows Web users to enter the URL www.CIWcert/u/ecl.com in the browser address bar to access the site, instead of having to remember and enter the IP

address?

- A. SSL
- B. DNS
- C. HTTP
- D. NNTP

Correct Answer: B

QUESTION 8

Aisha is coding a Web site using a GUI HTML editor. She wants to quickly check her code for errors and compliance with HTML standards as she works. How can she best accomplish this?

- A. Render and validate the code using <http://validator.w3.org>.
- B. Render the code with a browser to see if it looks correct.
- C. Validate the code using <http://validator.w3.org>.
- D. Validate the code using the GUI Validator.

Correct Answer: D

QUESTION 9

When developing Web pages, it is important to test the pages with:

- A. current versions of multiple browsers.
- B. current versions of Internet Explorer and Firefox.
- C. current and older versions of multiple browsers.
- D. current and older versions of Internet Explorer and Chrome.

Correct Answer: C

QUESTION 10

You are distributing a large video game file using BitTorrent. First, you upload the initial file and make it available via a central server called a tracker. Other users can then connect to the tracker and download the file. Each user who

downloads the file makes it available to other users to download. The use of BitTorrent significantly reduces the original provider's hardware and bandwidth resource costs.

BitTorrent is an example of what type of network?

- A. Centralized network
- B. Client-server network
- C. Peer-to-peer (P2P) network
- D. Virtual private network (VPN)

Correct Answer: C
