- A.
- B.
- C.
- D.

Correct Answer: A

QUESTION 3

Which choice describes a correct order of precedence for implementing CSS?

- A. Inline styles override all other styles.
- B. External styles override all other styles.
- C. Internal (embedded) styles override inline styles.
- D. External styles override internal (embedded) styles.

Correct Answer: A

QUESTION 4

Matthew has embedded a video in his Web page using the HTML5 video format. The video is not rendering properly. He asks Arlene to help determine the problem, so she reviews his code, which appears as follows:

```
<video height="210" class="center" controls="controls">  
<video src="video.ogv" type="video/ogg" />  
Your browser does not support the HTML5 video element.  
</video>
```

What is wrong with this code?

- A. The ogg video format is not supported by HTML5.
- B. One of the video tag instances has not been properly closed.
- C. The browser plug-in information required to view the video is missing.
- D. The second instance of the element should be replaced with the element.

Correct Answer: D

QUESTION 5

When developing Web pages, it is important to test the pages with:

- A. Current versions of multiple browsers.
- B. Current versions of Internet Explorer and Firefox.
- C. Current and older versions of multiple browsers.
- D. Current and older versions of Internet Explorer and Chrome.

Correct Answer: C

QUESTION 6

Acme Company has been receiving complaints from its suppliers saying that its extranet site does not render correctly in all their employees' browsers. The suppliers are asking that the extra net site be fixed so that everyone can access it, regardless of browser type. When examining this problem, the Acme Web Development team finds that many developers worked on the site and each used code that he or she was comfortable with. To resolve this problem, what can the Acme developers do?

- A. Edit the code so that it consistently uses uppercase letters.
- B. Edit the code in several common browsers before publishing.
- C. Edit the code so that it conforms to a single W3C HTML standard.
- D. Edit the code so that it follows a single W3C scripting language standard.

Correct Answer: C

QUESTION 7

You are modifying an existing Web page that needs to validate as HTML5 code. To create a rectangular hot-spot in an image map that links to www.xyz.com, which code would you nest inside the container tags?

A. container tags.

Which attribute is used with the `input` element to designate the fields that will appear in the form?

A. The type attribute

B. The name attribute

C. The value attribute

D. The action attribute

Correct Answer: A

QUESTION 9

You are creating a style sheet to format the pages on your company's Web site. One section will have a black background with white text. What is the hexadecimal reference you would use to specify the text color for this portion of the Web page?

A. "white"

B. #000000

C. #FFFFFF

D. "255,255,255"

Correct Answer: C

QUESTION 10

Karen is the Webmaster for her company. Management would like to make the company's intra net site more effective by providing links to internal HR forms for all employees to access. These forms are currently stored on the company's file server and are updated quarterly. For security reasons, the Web server does not allow linking to the company's file server. How should Karen create these links?

A. Upload the forms to the Web server and create local relative links to the files.

B. Upload the forms to the Web server and create local absolute links to the files.

C. Upload the forms to the Web server and create external relative links to the files.

D. Upload the forms to the Web server and create external absolute links to the files.

Correct Answer: A
