QUESTION 1

Channel Network Clocks are used to provide the timing source for what kind of data?

- A. Transmit
- B. Receive
- C. Old
- D. Discarded
- E. A and D
- F. A and B

Correct Answer: F

QUESTION 2

SONET Optical Carrier - 3 or OC-3 is what speed?

- A. 155M data packets per second
- B. 155M bits per second
- C. 155M bytes per second
- D. 155M blocks per second

Correct Answer: B

QUESTION 3

Switched Channel Circuit Network by definition is network that provides:

- A. Packet switching.
- B. Cell Switching.
- C. temporary half-duplex connection from point A to point B.
- D. temporary full-duplex connection from point A to point B.
- E. permanent half-duplex network connections from point A to point B.
- F. permanent full-network connections from point A to point B.

Correct Answer: D

QUESTION 4

High-Definition Videoconferencing will require and use:

- A. the same camera from NTSC and PAL VTC systems
- B. typical off the shelf web camera
- C. high-definition camera
- D. all of the above

Correct Answer: C

QUESTION 5

What effect does the zoom function have relative to the camera's field of view?

- A. It widens the field at full zoom.
- B. It narrows the field at full zoom.
- C. It can either widen or narrow the field at full zoom.
- D. It has no effect on the field of view.

Correct Answer: B

QUESTION 6

Which two items does the ITU-T H.320 recommendation specify?

- A. The Technical requirements for narrow-band visual telephone systems and the terminal equipment typically for Video conferencing and video phone services
- B. The Technical requirements for wide-band visual telephone systems and the terminal equipment typically for Video conferencing and video phone services
- C. The Technical requirements to ensure that only those signal are transmitted which can be received and appropriately treated by the remote terminal, without ambiguity
- D. The Technical requirements for the broadcasting type multipoint system and terminal equipment, which allow the audiovisual signal from a transmitting terminal to be distributed to multiple receiving terminals

Correct Answer: AC

QUESTION 7

How many "Groups of Blocks" are used to create the Full CIF resolution?

- A. 12

- B. 48
- C. 10
- D. 3

Correct Answer: A

QUESTION 8

Which of the following statements about line-level and mic-level are true?

- A. Audio mixers can be connected into a line-level input.
- B. Line-level or mic-level can be used for any audio input device.
- C. Line-level and mic-level always have different impedance values.
- D. Voltage ranges are not the same between line-level and mic-level.

Correct Answer: AD

QUESTION 9

Which audio coding standards are described by H.323?

- A. G.711, G.721, G.722, and G.723
- B. G.711, G.722, G.728, and G.726
- C. G.711, G.722, G.728, G.723.1, and G.729
- D. G.711, G.722, G.728, and G.723.1

Correct Answer: C

QUESTION 10

IP address 172.52.12.27 is which type of address?

- A. Class A
- B. Class B
- C. Class C
- D. Class D

Correct Answer: B

QUESTION 11

Packet Traffic Examination Applications provide information regarding which functions? (Select two of the following options)

- A. Byte for Byte breakdown of all framed bits including Payload
- B. Audio Decoded Sound
- C. Video Decoded Picture
- D. Layers 1-7 Header Breakdown
- E. Layers 2-7 Header Breakdown
- F. Layers 4 and 5 Only Header Breakdown

Correct Answer: AE

QUESTION 12

Gatekeeper messages for registration and admission that are successful will always have the Generic structure as:

(Note - "XX" - is a variable value that represents specific Gatekeeper names)

- A. RequestXX, ReplyXX
- B. RequestXX, DenyXXC
- C. XXRequest, XXReply
- D. XXRequest, XXConfirm
- E. XXRequest, XXAcknowledged

Correct Answer: D

QUESTION 13

What are five typical parameters required from an H.323 Terminal for successful Gatekeeper Registration?

- A. H.323 End Point ISDN and SPID Numbers and ISDN Sub-Address Numbers
- B. Current H.323 EndPoint TCP/IP Layer 3 address of the VTC
- C. Current H.323 Layer 4 Addresses to commence signaling
- D. UDP and RTP Header
- E. E.164 alias

- F. Address of the Gateway
- G. H.323 alias
- H. Address of the Gatekeeper
- I. Address of the MCU

Correct Answer: BCEGH

QUESTION 14

How is noise measured?

- A. Volume
- B. Distance
- C. Amplitude
- D. Impedance

Correct Answer: AC

QUESTION 15

Real Time Transport Protocol and Real Time Transport Control Protocol are used to provide:

- A. Lower Layer Transport of Data Collaboration.
- B. Lower Layer Transport of Audio and Video.
- C. Upper Layer Data Packet Sequencing, Timing, and Synchronization for Audio and Video.
- D. Upper Layer Packet Loss and Packet Errors Statistics and Corrective Action.
- E. A and B.
- F. C and D.
- G. all of the above.

Correct Answer: F
