Correct Answer: BCD

QUESTION 12

Which three statements are true regarding the use of the Database Migration Assistant for Unicode (DMU)? (Choose three.)

- A. A DBA can check specific tables with the DMU
- B. The database to be migrated must be opened read-only.
- C. The release of the database to be converted can be any release since 9.2.0.8.

- E. The DMU can report columns that are not represented in the converted character set

Correct Answer: ADE

A: In certain situations, you may want to exclude selected columns or tables from scanning or conversion steps of the migration process.

D: Exceed column limit

The cell data will not fit into a column after conversion.

E: Need conversion

The cell data needs to be converted, because its binary representation in the target character set is different than the representation in the current character set, but neither length limit issues nor invalid representation issues have been found.

QUESTION 14

Your multitenant container database (CDB) CDB1 has two pluggable databases, PDB1 and PDB2. The local net service name CDB1 connects to the root database, and the service names PDB1 and PDB2 connect to the pluggable databases (PDBs), PDB1 and PDB2, respectively.

SQL> ALTER SYSTEM SET optimizer_use_sql_plan_baselines=TRUE SCOPE=BOTH;
```

Which statement is true about the OPTIMIZER_USE_SQL_PLAN_BASELINES parameter?

A. It gives an error because it cannot be set for the root database.

B. It is set to TRUE for the root database and the pluggable database PDBs, because values can be set for this parameter at the PDB level in a PDB.

C. It is set to TRUE for the root database and all the PDBs, because the value set at the root level has higher precedence.

D. It is set to TRUE for the root database and all the PDBs, but is effective only when the CDB is restarted and the PDBs are reopened.

Correct Answer: B

QUESTION 15

In your multitenant container database (CDB) that contains pluggable databases (PDBs), the hr user executes the following commands to create and grant privileges on a procedure:
