QUESTION 1

After settings up encryption for /dev/sdd1, you notice that the file system is not mounted during system

startup.

You suspect a configuration error in /etc/crypttab:

cat /etc/crypttab

#·mapping	device	password	options
sdd1	/dev/sdd1	TopSecret	

Assume that /etc/fstab is correct. Identify the reason why the file system is not mounted after system startup.

A. The option field cannot be empty.

B. The password field must contain the encrypted version of "TopSecret".

C. The password field must contain the file name of a file containing the correct encryption password.

D. /etc/crypttab is group readable, world readable, or both.

E. "TopSecret" is not the correct encryption password.

Correct Answer: A

QUESTION 2

Which two mandatory parameters are defined in the cpuset subsystem? (Choose two.)

A. shares

B. cpus

C. mems

D. memory-migrate

E. stat

Correct Answer: BC

Reference: https://www.oracle.com/technetwork/articles/servers-storage-admin/resource-controllers-linux1506602.html

QUESTION 3

You need to disable access to all LUNs shared through one specific target, target ID 3.

Which command would you use to achieve this?

A. tgtadm –update –mode target –tid 3 –name=online –value=0

B. tgtadm –mode target –op update –tid=3 online =0

C. tgt-admin –offline tid=3

D. service tgtd stop_target 3

Correct Answer: C

QUESTION 4

Examine the dtrace command:

dtrace -n `syscall::open:entry {printf("%s %s", execname, copyinstr(arg0)):}\\'

Identity the D built-in function that is in use.

A. open

B. execname

C. copyinstr

D. entry

Correct Answer: B

Reference: https://docs.oracle.com/cd/E19253-01/819-5488/gbxwv/index.html

QUESTION 5

Which three statements are true about the architecture and capabilities provided by SAMBA when installed on an Oracle Linux server?

A. The Oracle Linux server may act as a SAMBA server.

B. Printers on the Oracle Linux system may be shared with Windows clients.

C. SAMBA uses UDP to communicate with Windows servers.

D. Printers on a Windows system may not be shared with oracle Linux clients.

E. The Oracle Linux Server may act as a SAMBA client.

Correct Answer: BCE

QUESTION 6

Consider a cgroup configuration in the /etc/cgconfig.conf file:

mount {

cpuset = /cgroup/A;

cpu = /cgroup/A;

cpuacct = /cgroup/cpuacct;

}

group A1 {

perm {

admin {

uid = root;

gid = wheel;

}

task {

uid = root;

gid = users;

}

}

cpuset {

cpuset.mems="0";

cpuset.cpus="0";

}

cpu {

cpu.shares="5";

}

}

group A2 {

perm {

admin {

```
uid = root;

admin {

uid = root

gid = root;

}

task {

uid = root;

gid = users;

}

}

cpuset {

cpuset.mems="0";

cpuset.cpus="1";

}

cpu {

cpu.shares="5";

}

}
```

Which two statements are true?

A. Two cgroup hierarchies and three subsystems are defined; cgroup A1 and A2 are located in the same sgroup hierarchy.

B. Two cgroup hierarchies and three subsystems are defined; cgroup A1 and A2 are located in different cgroup hierarchiers.

C. Three cgroup hierarchies and three subsystems are defined; cgroup A1 and A2 are located in the same sgroup hierarchy.

D. Three cgroup hierarchies and three subsystems are defined; cgroup A1 and A2 are located in different cgroup hierarchiers.

E. Any user who is a member of the users group is allowed to move his or her own tasks from the root cgroup to cgroup A1 or cgroup A2.

F. Any user who is a member of the users group is allowed to execute tasks in cgroups A1 and A2 and change the cpu.shares parameter in cgroups A1 and A2.

Correct Answer: BD

QUESTION 7

Which command would you use to start a container in the background so that it does not use the current terminal as its console?

A. lxc-start-daemon –n

B. lxc-start –n --daemon

C. lxc-start –n --detach

D. lxc-start –n and

Correct Answer: D

QUESTION 8

Consider the Dtrace providers made available in Oracle Linux.

Which three providers are valid Oracle Linux Dtrace providers? (Choose three.)

A. dtrace

B. lockstat

C. kernel

D. syscall

E. fbt

F. io

G. sysinfo

Correct Answer: ABD

Reference: https://docs.oracle.com/cd/E37670_01/E50705/html/ol_diffs_dtrace.html

QUESTION 9

A new iSCSI target configuration is created in /etc/tgt/targets2.conf using a text editor. The file is used to avoid accidental destructive errors in the normal working configuration file /etc/tgt/targets.conf while testing is in progress.

Which command would you use to activate this configuration without affecting the default configuration file?

A. service tgtd restart

B. cat /etc/tgt/targets2.conf | tgt-admin –e

C. tgt-admin –e

D. tgt-admin –e –c /etc/tgt/targets2.conf

Correct Answer: B

QUESTION 10

What is the purpose of the in-addr.arpa domain that is used in a zone file for DNS name resolution in Oracle Linux?

A. to implement reverse name resolution for IPv4

B. to resolve nameserver names in the in-addr.arpa top-level domain

C. to implement reverse name resolution for IPv6

D. to resolve host names in the in-addr.arpa top-level domain

Correct Answer: C

Reference: https://docs.oracle.com/cd/E19683-01/817-4843/dnsintro-94/index.html

QUESTION 11

You create an XFS file system by using the command:

mkfs –t xfs –L /xfs1 –l logdev=/dev/sdd1 /dev/sdh1 You create the mount point /xfs1 and want to mount the file system on its mount point, before adding an entry for the file system to /etc/fstab.

Which two commands can you use to do this?

A. mount /dev/sdh1 /xfs1

B. mount LABEL=/xfs1 /xfs1

C. mount –t xfs –o logdev=dev/sdd1 /dev/sdh1 /xfs1

D. mount LABEL=/xfs1 –o logdev=/dev/sdd1 /xfs1

E. mount LABEL=/xfs1 –o logdev=/dev/sdd1

F. mount –t xfs LABEL=/xfs1 /xfs1

Correct Answer: CD

QUESTION 12

You want to install the i686 version of OL5.9 on your OL6.5 x86_64 host to build some packages in the oder environment.

Which create command line would you use?

A. lxc-create –n OL5.9 –t oracle -- -u ftp://public-yum.oracle.com/OL5/9/base/i386

B. lxc-create –n OL5.9 –arch=i386 –t oracle

C. You cannot run an i686 container on an x86_64 host.

D. lxc-create –n OL5.9 –t oracle -- -R 5.9 –arch i386

Correct Answer: D

QUESTION 13

Identify the two commands that can be used to set SELinux file labels back to their default values.

A. chcon

B. fixfiles

C. semanage fcontext

D. restorecon

E. matchpathcon

F. opdate_selinux

Correct Answer: AD

QUESTION 14

Which statement is true about btrfs file system devices?

A. You must execute the btrfs device scan after every reboot to add a device to a btrfs file system.

B. The btrfs device scan -all-devices command scans physical devices looking for members of a btrfs volume.

C. Blocks are automatically rebalanced across all existing devices after adding new devices.

D. A device may be added to btrfs only if the file system is unmounted.

Correct Answer: B

QUESTION 15 9 / 9

Which three statements are true about the contents of the /etc/ocfs2/cluster.conf configuration file?

A. The heartbeat stanza is required only if local heartbeat mode is enable.

B. All stanzas must start at the first column and end with a colon.

C. All parameters must start after a tab.

D. A blank line must demarcate each stanza.

E. A blank line must demarcate stanzas and parameters.

F. All parameters must start after a tab and begin with a colon.

Correct Answer: CDF
