- A. The Import utility

- B. The bridge
- C. Identity Provider
- D. Delegated Authentication

Correct Answer: D

---

#### QUESTION 5

Can you customize which of your identity providers appear on the Sign In page when users are accessing Oracle Identity Cloud Service either locally or through a specific app?

- A. No, because users should always sign in using their local authentication credentials.
- B. Yes, by using identity provider policies.
- C. Yes, by using sign-on policies.
- D. No, because any identity provider that's set to appear in the Sign In page will be displayed.

Correct Answer: B

---

#### QUESTION 6

How does a threat progression get identified in Identity SOC?

- A. Oracle CASB Cloud Service receives the threat intel from various data sources including Oracle Identity Cloud Service, and based on user behavior creates a threat in the Oracle CASB Cloud Service Threat Dashboard.
- B. Configuration and Compliance Cloud Service identifies the Configuration drift and forwards it to Oracle CASB Cloud Service, and based on user behavior identified from Oracle Identity Cloud Service creates the threat based on the risk score in Oracle CASB Cloud Service Threat dashboard.
- C. Oracle Security Monitoring and Analytics Cloud Service receives the threat intel from various data sources including Oracle Identity Cloud Service and Oracle CASB Cloud Service, and based on user behavior creates a threat based on the risk score in Oracle Security Monitoring and Analytics Cloud Service Threat dashboard.
- D. Oracle Orchestration Cloud Service receives the threat information from Oracle Security Monitoring Cloud Service and Oracle Identity Cloud Service, and various sources based on the information received from other sources creates a threat in Oracle CASB Cloud Service Threat dashboard.

Correct Answer: A

---

#### QUESTION 7

Which two steps are needed to integrate Oracle CASB Cloud Service with Oracle Identity Cloud Service? (Choose two.)

- A. In Oracle CASB Cloud Service navigate to Configuration and then to Identity Management providers. Select Oracle Identity Cloud Service and specify the Instance name/Client ID/Client Secret and URL to the Provider.

B. Create an Oracle CASB Cloud Service application in Identity Cloud Service and collect the Client ID/ Client Secret for the application created.

C. Create a trusted application in Identity Cloud Service and collect the Client ID/Client Secret for the application created.

D. In Oracle CASB Cloud Service navigate to Configuration and then to Identity Management providers. Select Oracle Identity Cloud Service and specify the Client ID/Client Secret.

Correct Answer: AC

---

### QUESTION 8

You hire a third-party company to work in your Oracle Cloud environment. These partner employees work remotely and need to manage PaaS and IaaS instances in your environment. Your security officer requires that each partner employee provide a second verification factor on top of the traditional user name and password.

Which option do you configure in Oracle Identity Cloud Service for this to occur?

A. Multi-Factor Authentication

B. Adaptive security

C. The bridge

D. Identity provider policies

Correct Answer: A

---

### QUESTION 9

Which data CANNOT be captured by running out-of-the box operational or historical reports in Oracle Identity Cloud Service?

A. How many times user signed in to Oracle Identity Cloud Service

B. Users who either have signed in to Oracle Identity Cloud Service or who couldn't sign in to Oracle Identity Cloud Service

C. Users who use rogue accounts to sign in to Oracle Identity Cloud Service

D. Users who have been assigned to and removed from Oracle Identity Cloud Service administrator roles

Correct Answer: D

---

### QUESTION 10
