QUESTION 1

When the Microsoft Failover Cluster support option is selected in Veritas Storage Foundation for Windows, the minimum and maximum quorum arbitration times can be adjusted. What is the optimal arbitration time setting for a dynamic quorum?

- A. Minimum time - 30 seconds; Maximum time - 120 seconds
- B. Minimum time - 7 seconds; Maximum time - 60 seconds
- C. Minimum time - 15 seconds; Maximum time - 60 seconds
- D. Minimum time - 60 seconds; Maximum time - 120 seconds

Correct Answer: A

QUESTION 2

Which command is used to validate recent changes made to the cluster configuration?

- A. hasys -verify
- B. haconf -verify
- C. hacf -verify
- D. hastatus?erify

Correct Answer: C

QUESTION 3

An administrator is tasked with creating a new fileshare service group. Which requirement must be met to run the fileshare wizard?

- A. A cluster disk group must be created with the volumes mounted and online.
- B. A secondary disk group must be created with the volumes mounted and online.
- C. A cluster disk group must be created with the volumes mounted and offline.
- D. A secondary disk group must be created with the volumes mounted and offline.

Correct Answer: A

QUESTION 4

What is required to make a fileshare highly available?

- A. The fileshare must be created first.
- B. The volumes must be mounted to a mountpoint.
- C. The fileshare wizard must be run on the active node.
- D. The fileshare wizard must be run on an inactive node.

Correct Answer: C

QUESTION 5

What are two benefits of FlashSnap offhost processing tasks? (Select two.)

- A. They increase performance by enabling fast resynch logging.
- B. They increase performance by enabling caching on dynamic volumes.
- C. They provide a realistic basis for testing new applications.
- D. They recover a database more quickly than by full restoration from backup media.
- E. They decrease the amount of disk space required for decision support analysis.

Correct Answer: CD

QUESTION 6

Which benefit does Veritas Storage Foundation for Windows bring to stand-alone server environments that share storage between multiple hosts?

- A. Private disk groups
- B. Multiple disk groups
- C. Primary disk groups
- D. Foreign disk groups

Correct Answer: A

QUESTION 7

An organization is upgrading all network switches in its data center. Per standard operating procedures, the administrator shut down all systems in the data center. After the switches were upgraded, the servers were restarted. However, a two node cluster was in a waiting state after the servers were restarted. Which command can the administrator run to help determine whether the heartbeat network is running properly?

- A. `gabconfig -a`
- B. `ipconfig`

- C. lltstat -H
- D. hacf -verify

Correct Answer: A

QUESTION 8

An application is experiencing various resource failures. The application administrator wants Veritas Cluster Server (VCS) to take all resources offline after failure. The entire application should remain offline. Which attribute should the administrator use?

- A. ManageFaults
- B. FailOverPolicy
- C. AutoFailOver
- D. Critical

Correct Answer: C

QUESTION 9

Which dynamic disk group state supports fast failover?

- A. Imported Read-Only
- B. Imported Multi-Access
- C. Deported Read-Only
- D. Deported Multi-Access

Correct Answer: C

QUESTION 10

What is the default SCSI protocol setting in Veritas Storage Foundation for Windows when a Microsoft Failover cluster is installed in a Windows Server 2008?

- A. iSCSI
- B. SCSI-1
- C. SCSI-2
- D. SCSI-3

Correct Answer: D

QUESTION 11

Which two channels can be used for the second Veritas Cluster Server (VCS) heartbeat link? (Select two.)

- A. private network
- B. public network
- C. VPN network
- D. TCP/IP network
- E. storage area network

Correct Answer: AB

QUESTION 12

An organization has a three node cluster with a web service group and a database service group. The database service group must start first and the service groups must reside on different servers. Which service group dependency will keep the service groups on separate servers if a critical resource in the database service group faults?

- A. online global
- B. online local
- C. offline local
- D. online remote

Correct Answer: D

QUESTION 13

Support asked an administrator to collect logs for a resource type. Which attribute needs to be set?

- A. AgentDbg
- B. LogDbg
- C. AdvDbg
- D. Debug

Correct Answer: B

QUESTION 14

Which two actions does dynamic disk group split and join enable? (Select two.)

- A. moving LUNs between disk groups
- B. joining two volumes between two sites
- C. moving disks between volumes
- D. joining disk groups between two servers
- E. performing offhost processing for backups

Correct Answer: AE

QUESTION 15

Why would an administrator create a campus cluster?

- A. to increase write I/O performance
- B. to decrease downtime
- C. to reduce hardware costs
- D. to simplify the environment

Correct Answer: B
