QUESTION 1

A Deployment Solution administrator is creating a job to capture an image of a computer's hard drive using a Disk Image task. What should precede the Disk Image task?

- A. a task to run Sysprep
- B. a task to defrag the disk
- C. a task to run PC Transplant
- D. a task to capture the computer's OS license key

Correct Answer: A

QUESTION 2

Which protocol needs to be configured when using Real-Time System Manager to update a user's password?

- A. ASF
- B. WMI
- C. AMT
- D. WS-MAN

Correct Answer: B

QUESTION 3

A system administrator deploys the Altiris Client Management Suite 7.1 agents and plug-ins. Some of the agent and plug-in installations fail during the install. Which option should be enabled in order to track agent and plug-in installation progress?

- A. Enable Verbose Reporting of Status Events
- B. Enable Trace Reporting of Status Events
- C. Allow Failed Job Reporting for Status Events
- D. Allow Agent Event Reporting for Status Events

Correct Answer: A

QUESTION 4

What are the four steps, in correct order, to a Managed Delivery policy execution or remediation phase?

- A. policy execution, applicability check, compliance check, package download
- B. compliance check, remediation action, compliance check, report to Notification Server
- C. package download, compliance check, remediation action, report to Notification Server
- D. compliance check, package download, compliance check, policy execution

Correct Answer: B

QUESTION 5

After customizing the preboot configuration files, previously created configurations need to be updated. Each file is highlighted and then the option to rebuild them is selected. After all items have been updated, the "Save" button on the policy is selected to ensure all changes are stored in the database. However, after several hours or even a day, the configuration files on the PXE servers maintain an old date instead of the new date. Why do the PXE servers have the old date?

- A. The PXE servers are missing from the policy assigned to the preboot configurations because several policies were modified at the sametime.
- B. SBS Services must first be restarted to accept new policy changes from the server even though the agent has received the policy.
- C. The PXE Server configuration policy must also be updated at the same time as the preboot configurations.
- D. The preboot configuration policy changes are already saved and have been lost due to saving the policy again.

Correct Answer: D

QUESTION 6

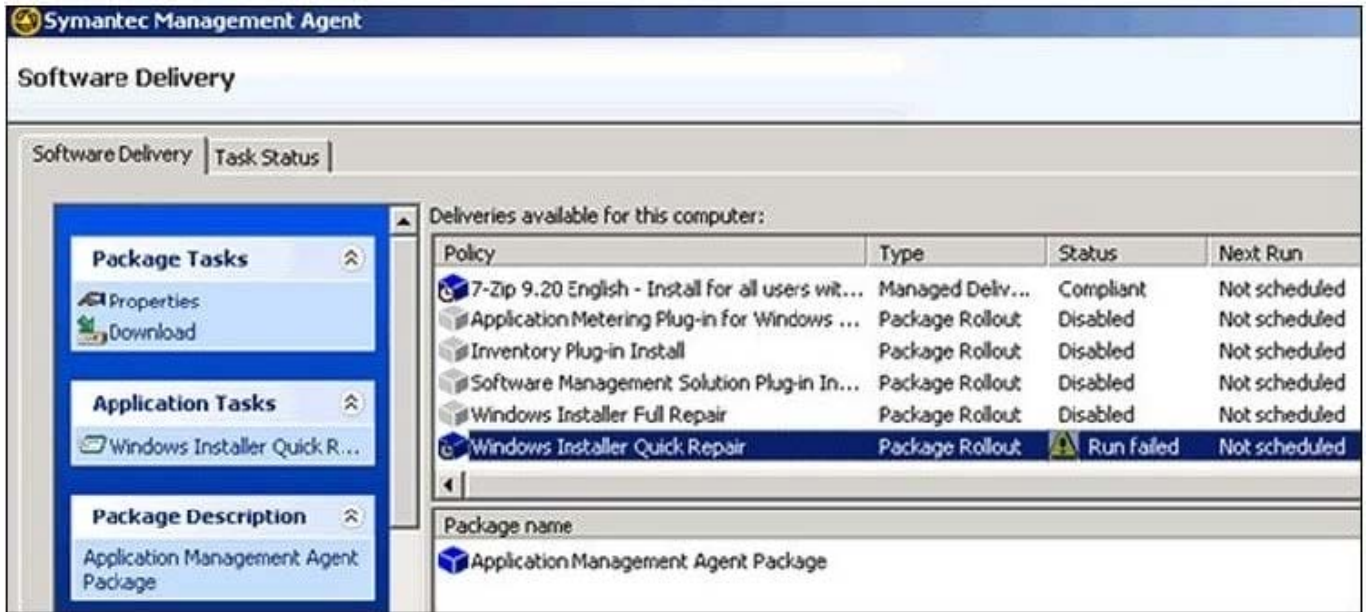

A help desk technician is contacted by a user who states that a critical application is working differently than expected. After remotely diagnosing the problem, a system administrator discovers that a key file is missing from the application directory. Which tool within Altiris Client Management Suite 7.1 allows the administrator to resolve this issue without requiring a redeployment of the application or system?

- A. Software Management Solution
- B. Real-Time System Manager
- C. pcAnywhere
- D. Application Management

Correct Answer: C

QUESTION 7

Refer to the exhibit.

A software delivery policy titled "Windows Installer Quick Repair" fails. How should a system administrator reschedule the installation of this task from the Software Delivery tab of the Symantec Management Agent?

- A. Delete the policy, re-download the task and click on Application Task to automatically re- run the task.
- B. Click on Application Task to automatically re-run the task.
- C. Click on the policy properties, select the Run History tab, right-click the run-time, and set go to automatically re-run the task.
- D. Click on the policy properties to automatically re-run the task.

Correct Answer: B

QUESTION 8

An administrator receives notification of a new vulnerability threat from Symantec Deepsight Alert Services. The alert includes the name of an executable that should be prevented from running. Which policy should the administrator configure?

- A. Malware Blocking policy
- B. Application Metering policy
- C. Custom Inventory policy
- D. Software Inventory policy

Correct Answer: A

QUESTION 9

How can greater efficiency and consistency be achieved when deploying multiple Managed Software Delivery policies to endpoints?

- A. Update the Managed Delivery Settings policy to define standard default settings for new Managed Delivery policies.
- B. Configure and run the Update Managed Delivery Policies task to reconfigure Managed Software Delivery policies with default settings.
- C. Configure the Default Software Settings policy to specify standardized settings for newly created Managed Software Delivery policies.
- D. Enable the Synchronize Software Policies scheduled task to update existing Managed Software Delivery policies with predefined settings.

Correct Answer: A

QUESTION 10

7.1 by default? (Select two.)

- A. Symantec Software Librarian
- B. Symantec Supervisors
- C. Symantec Level 2 Workers
- D. Symantec Administrators
- E. Software Portal Administrators

Correct Answer: AD

QUESTION 13

Based on a corporate policy, every 12 months one-third of the organization's computers are replaced with new systems. This results in very large purchase orders being placed all at the same time. Their current replacement processes cause significant productivity losses for the users during the replacement period. What can Deployment Solution do to help reduce their productivity losses?

- A. It can simplify the deployment process by bundling all steps for new system builds into a single automated policy including operating system deployment, software provisioning, and user configuration.
- B. It can allow for automatic creation of new computer records from an imported lists of computer information from the manufacturers, which simplifies the imaging process.
- C. It can simplify the process of computer deployments to departments by coordinating with an Active Directory connector for automated configuration setting tasks.
- D. It can add an interface in the console to simplify and synchronize deployment schedules by allowing department heads to enter personal maintenance plans.

Correct Answer: B

QUESTION 14

What are two Software Update Plug-in responsibilities? (Select two.)

- A. gathers an inventory on all installed software and their associated service pack level
- B. sends execution results of all software installed to the Notification Server
- C. gathers specific inventory on supported operating systems, applications, and the associated service pack level
- D. sends execution results of applied software bulletins to the Notification Server
- E. notifies users before a Managed Delivery policy executes

Correct Answer: CD

QUESTION 15

An inventory policy is set to run weekly at 18:00 on Wednesdays and is present on all computers. However, a user shuts down a laptop right after the inventory starts at 18:00 and turns it on the next morning at 08:00. When will the inventory run?

- A. Thursday morning at 08:00
- B. next Wednesday evening at 18:00
- C. Thursday evening at 18:00
- D. never

Correct Answer: B
