QUESTION 7

Which information in the HTTP request is used to determine if it is subject to the referrer exceptions feature in the Cisco WSA?

- A. protocol

- B. version
- C. header
- D. payload

Correct Answer: C

Requests for embedded content usually include the address of the site from which the request originated (this is known as the "referer" field in the request's HTTP header). This header information is used to determine categorization of the referred content.
