QUESTION 1

You want to improve the students' research skills by using ICT resources. The solution must help meet the school's organizational goals.

What should you do?

This item is part of a case study. To view the case study information, click on the Case Study button below.

- A. Tell the students to search for information on the Internet.
- B. Give the students a list of Internet links to sites about acid rain.
- C. Give the students printed Web pages about acid rain.
- D. Work with the students to create a list of search terms.

Correct Answer: D

QUESTION 2

This item is part of a case study. To view the case study information, click on the Case Study button below.

- A. Email
- B. a search engine
- C. a blog
- D. the online educators' community

Correct Answer: B

QUESTION 3

Certain teachers at the school question the value of using video conferencing for the project.

What is the most important benefit of video conferencing as it is being used in this project?

This item is part of a case study. To view the case study information, click on the Case Study button below.

- A. Video conferencing provides an opportunity to use a new technology.
- B. Video conferencing provides an opportunity for group collaboration.
- C. Video conferencing provides an authentic conversation about the problem.
- D. Video conferencing provides a reliable way to gather scientific information.

Correct Answer: B

QUESTION 4

In addition to learning about symmetry, how else should the students benefit from using ICT during the second mathematics lesson?

This item is part of a case study. To view the case study information, click on the Case Study button below.

- A. ICT will teach them data entry skills.
- B. ICT will teach them computer programming skills.
- C. ICT will help them develop presentation skills.
- D. ICT will help them develop collaboration skills.

Correct Answer: D

QUESTION 5

You are a teacher at a secondary school. You have 30 students in your class. Your classroom contains 10 laptop computers.

You plan a project for the students. You will provide the students with information in three different formats: audio recordings, photographs, and printed documents. The students must combine the information to produce graphs and charts in a detailed report.

What is the best way to organize the project?

- A. Divide the project into a series of separate tasks. Allocate each task to a different student. Ask all of the students to create their own detailed report.
- B. Create a rotation schedule for the classroom computers. Ask every student to use their turn on the computer to produce their own detailed report.
- C. Provide all of the information to all of the students. Ask every student to explain how they will achieve the goals of the project.
- D. Divide the class into 10 groups.

Ask the groups to work collaboratively to assemble the detailed report.

Correct Answer: D

QUESTION 6

The school recently implemented the planned ICT changes and deployed laptops in your classroom.

Some of the laptops can access the Internet, while others cannot.

You want to ensure that all of the laptops can access the Internet.

What should you verify?

- A. the wired network connection of the laptops
- B. the wireless network connection of the laptops
- C. whether the Internet router is on
- D. whether the laptops are plugged into a power outlet

Correct Answer: B

QUESTION 7

The teachers are concerned that their lack of experience with video conferencing will hinder their ability to achieve the planned lesson.

What advice should you provide to the teachers to help them achieve the planned lesson?

This item is part of a case study. To view the case study information, click on the Case Study button below.

- A. Tell them that video conferencing is a simple process and not to worry.
- B. Start by using technology that they are most familiar with.
- C. Teach students the benefits of video conferencing before the lesson.
- D. Test the video conferencing equipment before the lesson.

Correct Answer: D

QUESTION 8

You teach a class of 20 students. Your classroom contains six computers.

You run an activity that is carried out mostly on paper.

Before the end of the activity, the students will require access to the computers.

Which lesson structure should provide the best learning experience for the students?

- A. Create several different activities that require the computers at different stages during the lesson.
- B. Execute the computer-based portion of the activity as a class demonstration.
- C. Modify the tasks of the lesson so that only some of the students require access to the computers.
- D. Have all of the students perform the same activity and instruct the students to take turns using the computers.

Correct Answer: D

QUESTION 9

You are a teacher at a primary school. Your students are 9 and 10 years old.

Your classroom contains one desktop computer. Each student gets a 15-minute turn using the computer. The computer is always being used during class hours. A new student with a physical disability joins the class. The student will need to complete his writing tasks

on a classroom computer until he gets his own laptop computer. What is the least disruptive and most equitable solution?

- A. Borrow a desktop computer from the school administration.
- B. Provide the new student access to the classroom computer after class hours.
- C. Provide the new student priority access to the classroom computer.
- D. Maintain the existing rotation schedule for the classroom computer, and then pair the new student with other students during their turn on the computer.

Correct Answer: A

QUESTION 10

You plan to have an expert speaker address the students about a recent historical event.

Which two possible ICT resources should you recommend that the students use to create an accurate record of the speaker's statements? (Each correct answer presents a complete solution. Choose two.) This item is part of a case study. To view the case study information, click on the Case Study button below.

- A. the digital voice recorder
- B. the LMS
- C. an Internet connection
- D. a digital camera
- E. a video camera
- F. the flatbed scanner
- G. the printers

Correct Answer: AE
