- B. 100 for the Appliance and 120 for the OVA version
- C. 120 for both the Appliance and OVA version
- D. 120 for the Appliance and 120 for the OVA version

Correct Answer: B

QUESTION 5

The Avaya Aura® Web Gateway (AAWG) needs to be configured to use an Avaya Aura® Media Server (AAMS).

How does the Avaya Aura® Web Gateway (AAWG) get associated to a particular Avaya Aura® Media Server (AAMS)?

- A. The Media Server FQDN(s) is/are dynamically discovered by Avaya Aura® Web Gateway (AAWG) using DNS and Avaya Aura® Device Services (AADS) Dynamic Discovery process
- B. The Media Server FQDN(s) is/are statically configured in under Media Settings in Avaya Aura® Web Gateway (AAWG) web GUI
- C. The Media Server is configured to be in a Location using the SMGR web GUI and then that location is selected using the Avaya Aura® Web Gateway (AAWG) web GU
- D. The Media Server IP Address(es) is/are statically configured under Media Settings in Avaya Aura® Web Gateway (AAWG) web GUI

Correct Answer: C

QUESTION 6

How can you improve Avaya Multimedia Messaging (AMM) reliability?

- A. Install AMM on a Hosted server on Cloud
- B. Add an extra CPU to the platform server
- C. Install AMM on a physical server directly
- D. Add multiple AMM Servers to a Cluster

Correct Answer: D

QUESTION 7

A user has connected to an Avaya Equinox™ Conferencing meeting room using a web browser. They report they cannot share applications with other people inside the Virtual Meeting room.

What is typically causing the problem?

- A. The user has not installed the "Avaya Screen Sharing" Add-in to their web browser

- B. The Virtual Meeting room has not had the "Application Sharing Enabled" checkbox
- C. The user is using Google Chrome instead of Mozilla Firefox
- D. The "Avaya Equinox™ for Web" extension has not been installed on the user browser

Correct Answer: D

QUESTION 8

For an Avaya Equinox™ Management Geo-redundancy deployment, which three servers are required? (Choose three.)

- A. Backup Server
- B. Slave Server
- C. Master Server
- D. Active Server
- E. Standby Server

Correct Answer: ADE

QUESTION 9

According to the Capacity of Equinox Conferencing 9.0, there are two different deployments for low, medium or large scale systems.

Which two are the deployment options? (Choose two.)

- A. CM-hosted, in which the Equinox Management server manages the conference while CM uses the own Avaya Aura Media Server to host the Media part of the conference
- B. All in One, in which the Equinox Management Server runs all functions in Equinox Conferencing 9.0
- C. Distributed, in which one Equinox Management Server with the Management piece enabled only, manages a number of other Equinox Management Servers with the Management piece disabled
- D. Standalone deployment with Equinox Management and Scopia Desktop Server with Gatekeeper and Endpoints across multiple locations
- E. Integrated, where the Equinox Management Server runs the Conference Management centrally and a number of Session Manager Servers host the Gatekeeper and Proxy functions distributed for all the conference participants across the network

Correct Answer: BC

QUESTION 10

What statement about licensing for Over The Top (OTT) and Team Engagement (TE) is correct?

- A. OTT uses a port-based licensing model while TE uses a user-based licensing model.
- B. OTT uses a user-based licensing model while TE uses a user-based licensing model.
- C. OTT and TE both use a user-based licensing model.
- D. OTT and TE both use a port-based licensing model.

Correct Answer: A
