A. listiu.cmd

B. listversion.bat

C. de_version.cmd

D. registryloader.bat

E. solutioninstaller.bat

Correct Answer: AE

QUESTION 6

A user inquires about why a text search is taking so long on some applications\\' Long Description fields. Why is this happening?

A. A different operating system is being used which adds overhead to transactions with the application server.

B. The search string is longer than 256 characters which is larger than the text field, and the search is getting cutoff.

C. A leading wildcard character in the text search string is being used which does not allow the use of the full text search catalog.

D. The browser\\\'s language is different than IBM Maximo Asset Management base language and has characters that are unique to the language set.

Correct Answer: C

QUESTION 7

A company has recently installed IBM Maximo Asset Management 7.5 (Maximo) and experienced a few bugs that are fixed with the latest fix pack. The Maximo administrator shuts down the Maximo Java Virtual Machine and proceeds to uninstall all the Maximo applications from the J2EE server. Once the fix pack is installed, the administrator builds a new Maximo EAR and redeploys it to the J2EE server. The administrator logs in and validates the new fix pack has been installed by checking the version from Help > System Information and determines the fix pack installation was successful. Later that day the Help Desk calls and says that no one can view any application help information, and the help link is not available. Why?

A. The Maximo fix pack has disabled the help functions in Maximo.

B. The Maximo administrator did not install the Maximo fix pack correctly.

C. The Maximo administrator did not update the properties for the Help application.

D. The Maximo administrator did not build and deploy the maximoiehs.ear file after installing the fix pack.

Correct Answer: D

QUESTION 8

There are several heap dump files visible when reviewing a customer\\'s J2EE server system. Why?

A. The Java heap has had several large memory objects.

B. The Java heap has experienced memory fragmentation.

C. The Java heap has experienced excessive compaction time.

D. The Java heap has experienced an out of memory condition.

Correct Answer: D

QUESTION 9
