QUESTION 1

Don is designing a highly-available, secure, high-traffic, public website for his company. If he wants to use IBM WebSphere Portal, what components should he consider?

- A. Dynamic cache and a stand-alone, WebSphere Portal server with disaster recovery.
- B. An authentication and authorization solution, a load-balancing solution, a WebSphere Portal server cluster with HTTP servers handling static content, clustered LDAP servers and database servers.
- C. A WebSphere Portal server cluster, step-up authentication, and network- attached,storage devices.
- D. An authentication and authorization solution, a business process engine, and a WebSphere Portal server cluster.

Correct Answer: B

QUESTION 2

Where are projects created using the IBM WebSphere Portal Managed Pages feature stored?

- A. Portal Site Web Content Library
- B. WebDAV repository
- C. Portal release database domain
- D. XMLAccess based files on the file system

Correct Answer: A

QUESTION 3

Which of the following choices best describes the steps for configuring SSL only for the login process?

- A. -Update the WP ConfigService to set the proper values for redirect.login.ssl and host.port.https. -Set the transport security constraint for /myportal to CONFIDENTIAL.
- B. -Locate the login link in the theme and add the ssl="true" attribute to the tag of the anchor. -Set the UseSecureLoginActionUrl parameter to "true" for the Login portlet.
- C. -Set the transport security constraint for /myportal to CONFIDENTIAL. -Locate the login link in the theme and add the ssl="true" attribute to the tag of the anchor.
- D. -Update the WP ConfigService to set the proper values for redirect.login.ssl and host.port.https. -Set the UseSecureLoginActionUrl parameter to "true" for the Login portlet.

Correct Answer: D

QUESTION 4

How do realms within IBM WebSphere Portal work with federatedLDAP repositories?

- A. Realms cannot be used in conjunction with federated repositories.
- B. Realms can only be used in federated repositories where the base entries overlap (for example c=us in LDAP1 and o=myco,c=us in LDAP2).
- C. Realms can be used in federated repositories except that the base entries must not overlap (for example c=us in LDAP1 and c=uk in LDAP2).
- D. Realms can only be used with federated repositories when the same user DN's exist in all repositories.

Correct Answer: C

QUESTION 5

Which of the following options best describes the difference between horizontal and vertical clustering?

- A. Vertical clustering takes full advantage of the resources of a multiprocessor system; horizontal clustering provides fault-tolerance and scalability by adding additional servers.
- B. Vertical clustering allows for users to authenticate against multiple LDAP sources; horizontal clustering allows multiple servers to act as one server
- C. Horizontal clustering replicates the back-end database in real-time; vertical clustering takes advantage of multiple IBM WebSphere Application Servers as a single cell.
- D. Horizontal clustering allows multiple HTTP servers to serve in a failover scenario; vertical clustering allows IBM WebSphere Portal servers to combine processor and memory into one virtual server.

Correct Answer: A

QUESTION 6

Which of the following statements about URL mapping is true?

- A. A single portal page can have only one friendly URL.
- B. Friendly URLs do not have control over setting the language for a page.
- C. Users must have the Editor role for a page to create a URL mapping context on that page.
- D. A friendly URL is a valid URL mapping context.

Correct Answer: D

QUESTION 7

To prepare the configuration tasks for a WebSphere Portal server to use a remote database, which option best describes the following properties files that need to be modified?

- A. wkplc_comp.properties
- B. wkplc_comp.properties and wkplc_dbtype.properties
- C. wkplc_dbtype.properties, wkplc_dbdomain.properties and wkplc.properties
- D. wkplc_comp.properties, wkplc_dbtype.properties, and db.config.properties

Correct Answer: C

QUESTION 8

Peter wants to change the cache expiration time for the IBM WebSpherePortal internal cache for unauthenticated WebSphere Portal pages. What does he need to do?

- A. Change the value of the public.expires property in the /config/services/NavigatorService.properties file.
- B. Change the value of the public.expires property in the WP NavigatorService resource environment provider using the deployment manager administrative console.
- C. Change the value of the public.expires property in the config/services/CacheManagerService.properties file.
- D. Change the value of the public.expires property in the WP CacheManagerService resource environment provider using the deployment manager administrative console

Correct Answer: B

QUESTION 9

All of the following statements are true regarding externalauthorization, except?

- A. Private pages cannot be externalized.
- B. When administrators use the Resource Permissions portlet to externalize or internalize access control for a resource, access control for all of its public child resources moves with it.
- C. When administrators use the XML configuration interface (xmlaccess) to externalize or internalize access control for a resource, access control for all of its public child resources moves with it.
- D. If a user inherits access to a resource from a parent resource, the user will lose the inherited access when the resource is externalized.

Correct Answer: C

QUESTION 10

Choose the two items that correctly describe Cooperative Portlets.

- A. Cooperative portlets communicate by using properties that are produced and consumed by portlet actions.
- B. An administrator can use cooperative portlet support with either IBM, JSR 168, or JSR 286 portlets.

- C. JSR 286 portlets require an additional WSDL deployment descriptor which defines portlet actions.
- D. Cooperative portlets represent an IBM-specific API for publish/subscribe communication between portlets.

Correct Answer: AD

QUESTION 11

Jim is assigning permissions to a newly installed portal and assigns the SalesManager group the following roles on the following pages: Home page: User My Sales: Manager Team Page: Privileged User Sales Results: Delegator What mistake has Jim made?

- A. User role on the Home page is unnecessary, because it is implicitly granted.
- B. Manager role can only be granted for individual users.
- C. Privileged user is not a role.
- D. Assigning Delegator on pages makes no sense, because it is only applicable for groups and users.

Correct Answer: D

QUESTION 12

IBM WebSphere Portals supports multiple ways for portlets to exchange or share information. Select the option that does not describe this functionality.

- A. Public render parameters allow JSR 286 portlets to share navigational state information.
- B. Portlet Wires are used to direct the information flow between portlets that communicate using JSR 286 Portlet events or the WebSphere Portal Cooperative portlets API.
- C. Cooperative portlets represent an IBM-specific API for publish/subscribe communication between JSR 168 and JSR 286 portlets.
- D. Portlet events provide a powerful and flexible publish/subscribe mechanism for communication between JSR 286 portlets.

Correct Answer: C

QUESTION 13

After deploying a remote search service on a server, which of the following best describes how a portal administrator would configure portal search to use the remote search service?

- A. Configure the remote search service parameters in the wkplc.properties file and run the ConfigEngine enable-remote-pse-service command.
- B. For the WP Configuration service, set the pse.remote.type custom property to match the type of remote search service that was deployed.

C. From the Manage Search portlet, define a new search service and set the PSE_Type parameter to the remote search service type (i.e, SOAP).

D. Set the Portal Search Center portlet configuration parameter named search_type to remote and search_name to the hostname of the server where the remote search service has been deployed.

Correct Answer: C

QUESTION 14

When using the branding capabilities of IBM WebSphere Portal, what best defines Themes optimization?

A. Themes optimization requires a monolithic design to achieve the flexibility that allows administrators to achieve better performance.

B. Theme optimization uses modules and profiles to achieve the flexibility that allows administrators to achieve better performance.

C. Theme optimization uses modules and monolithic design to achieve the flexibility that allows administrators to achieve better performance.

D. Theme optimization uses CSS to achieve the flexibility that allows administrators to achieve better performance.

Correct Answer: B

QUESTION 15

Cooper is trying to configure a search collection for a portal in a clustered environment. Where should he put the search collection when the Search server is a separate server.

A. The search collection should be copied on each IBM WebSphere Portal node.

B. The search collection should be setup on the search server.

C. The search collection resides in the database in version 8.0.

D. The search collection cannot be located on a shared file system.

Correct Answer: B
