QUESTION 1

What are the requirements for a roaming policy?

- A. Notes 8.5 standard client and Domino 8.5 server
- B. Domino 8.x or later server
- C. Notes 8.x or later client
- D. Domino 8.5 server

Correct Answer: A

QUESTION 2

Which domain document provides servers in a Domino domain with information on where to transfer mail destined for external SMTP addresses?

- A. Foreign domains
- B. Internet Domains
- C. Adjacent domains
- D. Foreign SMTP domains

Correct Answer: D

QUESTION 3

Mike needs to determine how a set of new policies will affect his users. What can Mike use to determine the effect of the new policies on his users?

- A. Log in as a user and see what policies have changed.
- B. Open the user view in the Domino Administrator client, select a user, and choose Actions - Show User Policies.
- C. From the Basics tab of the Access Control List, click Effective Access.
- D. Use the Policy Synopsis tool from the People view in the Domino Administrator client.

Correct Answer: D

QUESTION 4

Message recall is able to recall messages from a user's sent view in their Domino 8 mailfile. The administrator has enabled the mail policy for users to allow message recall up to 21 days. However, users are unable to recall messages older than 14 days. Which of the following is the possible cause?

- A. The user is utilizing a local replica
- B. The user only has editor access to their mailfile
- C. The server configuration document allows only 14 days
- D. The user accepts mail under multiple Internet addresses

Correct Answer: C

QUESTION 5

Pedro, a Domino administrator, has enabled the Inboxmaintenance feature from a mail policy document. How is the Inbox maintenance feature triggered and where does it run?

- A. The Inbox maintenance agent is enabled by default to run at 2 AM on all mail servers in the domain.
- B. The Administration Process periodically runs the Inbox Maintenance agent on each user's home server.
- C. Every time a user opens their mail file the Inbox maintenance agent runs locally on the user's workstation.
- D. The Inbox maintenance agent runs on a user's home server and is manually triggered by selecting Tools - Inbox maintenance from within their mail file.

Correct Answer: B

QUESTION 6

Which of the following fields only exists when configuring a roaming user with a roaming policy setting document?

- A. Roaming server
- B. Roaming directory
- C. Keep ID in address book
- D. Customize text for the first user dialog box

Correct Answer: D

QUESTION 7

Chaz, the Domino administrator, has noticed performance issues when LDAP searches are being performed against the Domino Directory. Which of the following is the best offered solution to improve performance?

- A. Extend the LDAP schema to add new attributes
- B. Create a full text index of the Domino Directory
- C. Configure Directory Assistance to load all users into memory in advance

D. Delete the (\$LDAP) view in the Domino Directory and let it rebuild automatically

Correct Answer: B

QUESTION 8

Jose set up Web authentication using primary and secondary directories. Which one of the following describes the order in which he set up directories to be searched?

A. Domino primary directory, then Domino secondary directories. This is the only option available.

B. Domino primary directory, then either Domino or LDAP secondary directories. The administrator can specify the order of secondary searches.

C. LDAP primary directory, then LDAP secondary directory, and then Domino secondary directories. This is the order in which secondary searches must be made.

D. Domino primary directory, then Domino secondary directory, and then LDAP secondary directories. This is the order in which secondary searches must be made.

Correct Answer: B

QUESTION 9

Each time Melissa creates a certifier ID, Domino creates a certifier ID file and which of the following?

A. Password database

B. Certifier document

C. Password hash file

D. Certifier database

Correct Answer: B

QUESTION 10

Henry created a security settings policy document for his organization to lock Internet passwords after a certain number of incorrect attempts. After he verified that the policy was correctly assigned to the users, he found that the lockout was still not functioning. Which of the following next steps should he take to enable this feature?

A. Have each user log in with an incorrect password to enable the feature.

B. Restart the server that offers the HTTP service so that the policy takes effect.

C. Make sure that Internet password locking is enabled in the server configuration document.

D. Create a test user account and enter incorrect passwords until the lockout takes effect. This then enables it for everyone.

Correct Answer: C

QUESTION 11

Which of the following policies offer client lock-down?

- A. Mail policy and security policy settings
- B. Mail policy and archive policy settings
- C. Desktop policy and mail policy settings
- D. Desktop policy and archive policy settings

Correct Answer: C
