100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by EMC  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

How is recovery defined in Microsoft SQL?

- A. Copying data from a backup, applying logged transactions to roll it forward and bringing the database online
- B. Copying the transaction logs and index from backup
- C. Applying logged transactions to corrupted data and bringing the database online
- D. Copying the database from the backup

Correct Answer: A

---

**QUESTION 2**

A customer notices that the backup process on the client is using too much CPU. What can be done to decrease the CPU usage on the client?

- A. Disable encryption in transit
- B. Disable encryption at rest
- C. Increase the backup window
- D. Disable throttling

Correct Answer: A

---

**QUESTION 3**

Which statement best describes a file system?

- A. Organizes data in a structured hierarchical manner using directories
- B. Defines block sizes depending on data type
- C. Collects related records and stores them as a unit
- D. Establishes a consistent file-naming convention

Correct Answer: A

---

**QUESTION 4**

How are local replication technologies classified?

- A. Network and storage array

- B. Host and storage array
- C. Network and CIFS
- D. Host and CIFS

Correct Answer: B

---

#### QUESTION 5

Which Microsoft Exchange Server 2007 feature supports single mailbox recovery?

- A. Recovery Database
- B. Database Availability Group
- C. Recovery Storage Group
- D. Checkpoint file

Correct Answer: C

---

#### QUESTION 6

How does a backup application identify files when they reside on cloud virtual storage?

- A. Filename
- B. Inode number
- C. Object ID
- D. File metadata

Correct Answer: C

---

#### QUESTION 7

A customer wants to run backups for unstructured client data where the level of granularity can be sacrificed for better performance. Which method for backing up the data best fits this situation?

- A. Raw device dump
- B. Cold backup
- C. File copy
- D. Hot backup

Correct Answer: A

---

**QUESTION 8**

A customer has experienced a disaster occurring over several days. During that time, several components of critical applications remained operational while other components failed. What will have the most impact to backup and recovery operations?

- A. Data consistency
- B. Backup retention
- C. RTO
- D. RPO

Correct Answer: A

---

**QUESTION 9**

A backup environment has 20 GB of data with 10 percent initial commonality. The data is backed up to a target-based deduplication system on a full, every day backup schedule. After the first backup, 5 GB of data is changed. The same data set is backed up every day.

How much data is sent over the network on the first and second backups?

- A. 20 GB for the first backup; 20 GB for the second backup
- B. 20 GB for the first backup; 5 GB for the second backup
- C. 18 GB for the first backup; 4.5 GB for the second backup
- D. 18 GB for the first backup; 18 GB for the second backup

Correct Answer: A

---

**QUESTION 10**

A customer has an existing NAS implementation that is backed up in a local two-way configuration. The customer is concerned that the attached tape drive is stopping and starting frequently during the backup. However, they see benefit in the local two-way configuration and want to keep it.

Which solution would you recommend to address their concern?

- A. VBB
- B. DDS
- C. DAR
- D. NDMP2D

Correct Answer: D

---

**QUESTION 11**

What is a characteristic of EMC NetWorker deduplication with Avamar?

- A. Identifies and stores only unique, variable-sized, subfile data objects
- B. Uses target-based deduplication
- C. Uses file-based deduplication
- D. Identifies and stores only unique, fixed-sized, metafile data objects

Correct Answer: A

---

**QUESTION 12**

Which switch port type is used for the interswitch link connectivity between two FC switches?

- A. G\_port
- B. E\_port
- C. N\_port
- D. F\_port

Correct Answer: B

---

**QUESTION 13**

A customer backup policy must meet the RPO management assigns. What backup configuration items must be considered to achieve the appropriate RPO?

- A. Retention periods and granularity
- B. Client and server parallelism
- C. Multiplexing and multistreaming
- D. Target backup devices

Correct Answer: A

---

**QUESTION 14**

In a cross-product environment where Avamar is integrated with NetWorker, in which component are the backups and restores managed?

- A. NetWorker storage node

- B. NetWorker server
- C. Avamar deduplication node
- D. Avamar server

Correct Answer: B

---

**QUESTION 15**

What are the components of a Logical Volume Manager (LVM)?

- A. Physical volumes, volume groups, logical volumes
- B. Physical groups, volume groups, logical volumes
- C. Physical groups, volume groups, logical groups
- D. Physical blocks, volume groups, logical groups

Correct Answer: A
